ANNUAL REPORT
OF THE
IMMIGRATION AND NATURALIZATION SERVICE
UNITED STATES DEPARTMENT OF JUSTICE
WASHINGTON, D. C.

FOR THE FISCAL YEAR ENDED JUNE 30, 1951

A. R. MACKEY
COMMISSIONER

JV
6414
.A2
1951

UNITED STATES DEPARTMENT OF JUSTICE
Immigration and Naturalization Service
Washington 25, D. C.

Report of the Commissioner
of Immigration and Naturalization

The Attorney General
United States Department of Justice

Sir: I have the honor to submit the Annual Report of the Immigration and Naturalization Service for the year ending June 30, 1951. The outstanding accomplishments of the Service during the year have been set forth in text and tables as well as some of the more pressing problems.

The report was prepared by Mrs. Helen Eckerson, Chief of the Statistics Unit of our Division of Research, Education and Information.

Respectfully submitted,

Angelo R. Mackey

Commissioner

Immigration and Naturalization Service
December 1, 1951

TABLE OF CONTENTS

	<u>Page</u>
Chapter 1 Introduction	
Chapter 2 Legislation and Litigation	
Public laws.....	5
Private bills introduced and enacted.....	6
Prosecutions and litigations.....	7
Writs of Habeas Corpus.....	10
Chapter 3 Immigration and Emigration	
Land border entries.....	14
Crewmen.....	15
Immigrants.....	16
Nonimmigrants.....	23
Exercise of Ninth Proviso.....	26
Agricultural laborers admitted.....	27
Canadian woodsmen.....	28
Petitions for immigration visas and reentry permits.....	28
Emigrants and nonemigrants.....	30
Chapter 4 Adjustment of Status	
Suspension of deportation.....	33
Displaced persons residing in United States.....	34
Preexamination.....	36
Exercise of the Seventh Proviso.....	36
Registry.....	37
Chapter 5 Enforcement	
Border Patrol.....	40
Investigations.....	43
Alien parole.....	48
Detentions.....	50
Deportations and voluntary departures.....	57
Exclusions.....	64
Chapter 6 Naturalization	
Declarations of intention.....	69
Petitions filed.....	69
Petitions granted.....	69
Petitions denied.....	72
Naturalizations revoked.....	72
Loss of nationality.....	73
Special certificates of naturalization.....	74
Citizenship acquired by resumption or repatriation.....	74
Derivative citizenship.....	75
Citizenship education.....	75

APPENDIX

- Table 1. Immigration to the United States: 1820 - 1951
- Table 2. Aliens and citizens admitted and departed, by months: Years ended June 30, 1950 and 1951
- Table 3. Aliens admitted, by classes under the immigration laws: Years ended June 30, 1947 - 1951
- Table 4. Immigration by country, for decades: 1820 to 1951
- Table 5. Immigrant aliens admitted and emigrant aliens departed by port or district: Years ended June 30, 1947 to 1951
- Table 6. Immigrant aliens admitted, by classes under the immigration laws and country or region of birth: Year ended June 30, 1951
- Table 6A. Immigrant aliens admitted, by classes under immigration laws and country of last permanent residence: Year ended June 30, 1951
- Table 6B. Immigrant aliens admitted to the United States under the Displaced Persons Act of 1948, as amended, by classes and country or region of birth: June 25, 1948 to June 30, 1951
- Table 6C. Displaced persons and other immigrant aliens admitted to the United States, by country or region of birth: Year ended June 30, 1951
- Table 7. Annual quotas and quota immigrants admitted: Years ended June 30, 1947 to 1951
- Table 8. Immigrant aliens admitted, by major occupation group and country or region of birth: Year ended June 30, 1951
- Table 9. Immigrant aliens admitted by country or region of birth, sex and age: Year ended June 30, 1951
- Table 10. Immigrant aliens admitted by race, sex and age: Year ended June 30, 1951
- Table 10A. Immigrant aliens admitted and emigrant aliens departed, by sex, age, illiteracy, and major occupation group: Years ended June 30, 1947 to 1951
- Table 10B. Immigrant aliens admitted and emigrant aliens departed, by country or region of birth, sex and marital status: Year ended June 30, 1951
- Table 11. Aliens and citizens admitted and departed, aliens excluded: Years ended June 30, 1908 to 1951
- Table 12. Immigrant aliens admitted and emigrant aliens departed, by State of intended future or last permanent residence: Years ended June 30, 1947 to 1951
- Table 12A. Displaced persons and other immigrant aliens admitted to the United States by rural and urban area and city: Year ended June 30, 1951
- Table 12B. Immigrant aliens admitted to the United States, by rural and urban area and city: Years ended June 30, 1947 to 1951
- Table 13. Immigrant aliens admitted and emigrant aliens departed, by country of last or intended future permanent residence: Years ended June 30, 1947 to 1951
- Table 13A. Immigrant aliens admitted and emigrant aliens departed by race or people: Years ended June 30, 1947 to 1951
- Table 14. Emigrant aliens departed by race, sex and age: Year ended June 30, 1951

APPENDIX (Cont'd)

- Table 14A. Emigrant aliens departed, by major occupation group and country or region of birth: Year ended June 30, 1951
- Table 15. Emigrant aliens departed, by country or region of birth, sex, and age: Year ended June 30, 1951
- Table 16. Nonimmigrant aliens admitted, by classes under the immigration laws and country or region of birth: Year ended June 30, 1951
- Table 17. Nonimmigrant aliens admitted, by classes under the immigration laws and country or region of last permanent residence: Year ended June 30, 1951
- Table 18. Nonimmigrant aliens admitted and nonemigrant aliens departed, by country of last or intended future permanent residence: Years ended June 30, 1947 to 1951
- Table 19. Nonimmigrant aliens admitted as temporary visitors, transits, students, or treaty traders in the United States, by district: On June 30, 1950 and 1951
- Table 20. Aliens excluded from the United States, by cause: Years ended June 30, 1942 to 1951
- Table 21. Aliens excluded from the United States, by cause and country of birth: Year ended June 30, 1951
- Table 21A. Aliens excluded from the United States, by race or people: Years ended June 30, 1942 to 1951
- Table 22. Alien crewmen deserted from vessels arrived at American seaports, by nationality and flag of vessel: Year ended June 30, 1951
- Table 23. Vessels and airplanes inspected, crewmen examined and stowaways found on arriving vessels, by districts: Years ended June 30, 1950 and 1951
- Table 24. Aliens deported, by cause and country to which deported: Year ended June 30, 1951
- Table 24A. Aliens deported and aliens departing voluntarily under proceedings: Years ended June 30, 1892 to 1951
- Table 25. Inward movement of aliens and citizens over international land boundaries by State and port: Year ended June 30, 1951
- Table 25A. Inward movement by air of aliens and citizens over international land boundaries by State and port: Year ended June 30, 1951
- Table 26. Purpose for which alien and citizen commuters cross the international land boundaries, by port: Year ended June 30, 1951
- Table 26A. Aliens and citizens possessing border crossing cards who crossed the international land boundaries, by classes and ports: Year ended June 30, 1951
- Table 27. Miscellaneous transactions at land border ports, by districts: Year ended June 30, 1951
- Table 28. Inward movement of aliens and citizens over international land boundaries: Years ended June 30, 1947 to 1951
- Table 29. Principal activities and accomplishments of Immigration Border Patrol, by districts: Year ended June 30, 1951

Passenger travel by air and by sea between Hawaii and continental United States (Mainland) and insular or outlying possessions: Years ended June 30, 1943 to 1951

Table 30B. Passenger travel between the United States and foreign countries by class of travel, nationality of carrier, and ports: Year ended June 30, 1951

Table 31. Passenger travel to the United States from foreign countries, by country of embarkation: Year ended June 30, 1951

Table 32. Passenger travel from the United States to foreign countries, by country of debarkation: Year ended June 30, 1951

Table 33. Alien passengers arrived in the United States from foreign countries, by port of arrival and country of embarkation: Year ended June 30, 1951

Table 34. Alien passengers departed from the United States to foreign countries, by port of departure and country of debarkation: Year ended June 30, 1951

Table 35. Citizen passengers arrived in the United States from foreign countries, by port of arrival and country of embarkation: Year ended June 30, 1951

Table 36. Citizen passengers departed from the United States to foreign countries, by port of departure and country of debarkation: Year ended June 30, 1951

Table 37. Declarations of intention filed, petitions for naturalization filed and persons naturalized: Years ended June 30, 1907 to 1951

Table 38. Persons naturalized, by classes under the nationality laws and country or region of former allegiance: Year ended June 30, 1951

Table 39. Persons naturalized by country or region of former allegiance: Years ended June 30, 1942 to 1951

Table 40. Persons naturalized, by country or region of former allegiance and major occupation group: Year ended June 30, 1951

Table 41. Petitions for naturalization denied, by reasons for denial: Year ended June 30, 1947 to 1951

Table 42. Persons naturalized, by sex and marital status with comparative percent of total: Years ended June 30, 1943 to 1951

Table 43. Persons naturalized, by sex and age: Years ended June 30, 1943 to 1951

Table 44. Persons naturalized, by States and territories of residence: Years ended June 30, 1947 to 1951

Table 45. Persons naturalized, by specified countries of former allegiance and by rural and urban area and city: Year ended June 30, 1951

Table 46. Persons naturalized, by country or region of birth and year of entry: Year ended June 30, 1951

Table 46A. Persons naturalized, by country or region of birth and country or region of former allegiance: Year ended June 30, 1951

APPENDIX (Cont'd)

Table 47. Persons naturalized, by statutory provisions for naturalization: Years ended June 30, 1947 to 1951.

Table 48. Writs of Habeas Corpus in exclusion and deportation cases: Years ended June 30, 1942 to 1951

Table 49. Prosecutions for immigration and nationality violations: Years ended June 30, 1942 to 1951

INTRODUCTION

This report presents some of the accomplishments and problems of the Immigration and Naturalization Service for the fiscal year ended June 30, 1951. Among the more important functions of the Service are the examination of aliens to determine their admissibility under immigration laws, the investigation, apprehension, detention, and deportation of aliens in the United States illegally, the prevention of illegal entry, the registration of aliens, and the examination of applicants who seek to become citizens through naturalization.

This agency, whose responsibilities relate so completely to human beings who are also aliens, is of course sensitive to the international tensions that exist. Possibly the major emphasis that marked the year was national security. This emphasis was crystallized by the Internal Security Act of September 23, 1950, which, by amendment to existing immigration and nationality laws, pervaded almost every activity of the Service.

The Act made membership per se in communist or totalitarian organizations, and participation in their programs, cause for exclusion, deportation, or denial of naturalization. The definition of membership was later modified when the law appeared to necessitate undue harshness in the case of aliens whose membership was of a purely involuntary nature. It stiffened parole controls and required a yearly address report from resident aliens. In the field of naturalization, it made reading and writing, as well as the ability to speak English, and a knowledge of the history of this country as well as of its Government and Constitution, prerequisite to naturalization.

The Internal Security Act for the first time recognized the inconsistency existing between the provisions of the immigration laws directing the deportation of aliens amenable thereto and the provisions in the naturalization laws which permitted the naturalization

of such aliens. The law now prohibits the naturalization of deportable aliens and additionally precludes an alien against whom deportation proceedings are pending from having a hearing upon the petition until the deportation proceedings have been completed.

Almost simultaneously with the passage of the Internal Security Act came other legislation which, while not nearly so far reaching in importance, was nevertheless a factor which created administrative, adjudicative, and enforcement problems. It will be recalled that on February 20, 1950, the Supreme Court held that administrative hearings in deportation cases must conform to the requirements of the Administrative Procedure Act, if resulting orders are to have validity. On September 27, 1950, Congress, by law, removed exclusion and expulsion proceedings from the pertinent provisions of the Administrative Procedure Act. This necessitated an about face in terms of conduct of hearings, appointment of hearing officers, and necessity for rehearings. These readjustments, however, have in the main been concluded, and procedures were functioning smoothly at the end of the report year.

Not new, but very prevalent, were other important factors that dominated the year's work.

Aliens who attempt surreptitious entry into the United States either as stowaways or as smuggled aliens are a vexing and constantly growing problem. New impetus was given to this unwelcome traffic by adverse conditions abroad, by the presence of many European and Oriental nationals in nearby countries, and by the higher prices paid to smugglers. Last year 497 stowaways were detected and excluded at ports of entry and 479 aliens were apprehended in the United States who had entered as stowaways or as smuggled aliens. In these cases as in all other cases of illegal entry, the chief deterrent is swift and vigorous legal action.

The expulsion of aliens reached phenomenal numbers last year. Of the 686,713 aliens required to depart from the United States last year, 13,544 were deported, and 14,176 were permitted to depart at their own expense after warrants of arrest were issued. During the past year 2,363 aliens were investigated to determine whether they were deportable as subversive aliens.

The problem of Mexican illegal aliens who come into the United States is still with us. The President's Commission on Migratory Labor found that wherever there were numbers of illegal aliens employed, wages were depressed and housing conditions were substandard. Last year there were 112,000 Mexican farm laborers legally employed. During the same period 510,000 aliens illegally in the United States were arrested by the Border Patrol. When the ratio of legal workers to arrested aliens is 1 to 5, it is evident that the whole spirit of immigration law is being defeated. These illegal entrants are not inspected as to political ideologies, health, literacy, or past criminal record. They are making a mockery of the contract labor

provision of the immigration laws which are designed to protect the American workers. After the end of the fiscal year, Public Law 78, approved July 12, 1951, reluctantly was signed by the President. Subsequently agreements were reached by the governments of Mexico and the United States. While this law establishes standards as to wages and working conditions for legally contracted aliens, it fails to get at the root of the problem, which is the illegal or wetback worker, and on this account it leaves much to be desired.

The Mexican illegal entrants by their very volume create easy access for non-Mexicans. During the fiscal year 201 non-Mexican aliens were apprehended after illegally crossing the Mexican border. It is not known, of course, how many have escaped apprehension. The danger in such conditions is beyond estimate during these times when alien forces of political and social evil are in violent struggle with the principles upon which our Government is established.

A few years ago wetback laborers were found only on farms within a few hundred miles of the Mexican border. Now, however, they are apprehended in our large industrial centers of the North, in factories as well as in the surrounding rural areas. The problem is not one of more laws for exclusions of aliens, but rather of need for more enforcement. Some beginnings have been made in meeting the problem. Last year the Immigration and Naturalization Service, for a brief period, was able to transport illegal Mexican aliens by air to places near their homes in central Mexico. This had a salutary effect in slowing down the number of apprehended aliens, since it made returns to the United States border more difficult for the alien. This could be continued for only a short time, because of lack of funds.

Effective law enforcement requires: that aliens who succeed in entering the United States illegally be apprehended promptly; that they be expelled quickly; and that smugglers and other flagrant violators be prosecuted vigorously as a deterrent to such criminal activity. Such an enforcement program requires additional investigators, examiners, and other personnel.

In addition, the enactment of legislation relating to the smuggling, harboring, concealing, and shielding from detention of aliens illegally in the United States will be a long step forward in the enforcement of our immigration laws.

While the officers of the Service, border patrolmen, immigrant inspectors, naturalization examiners, investigators, security officers, and all of us laid much stress upon the hard facts of enforcement, we have by no means been unmindful that ours is a service to render to law-abiding and deserving people with fairness and consideration. There were 96 million entries last year, at our land and sea ports.

Two hundred five thousand, seven hundred seventeen immigrants met our complicated requirements and found a home in the United States.

Ninety-six thousand, five hundred fifteen were displaced persons, whose years of hardship and wandering came to a close when they found a haven in the United States. Many cases of possible adjustment of status were considered and decided in favor of deserving aliens by suspension of deportation or other discretionary measures.

Largely because of the new requirements for naturalization, there was a substantial decrease in the number of persons naturalized; but 54,716 war brides and others were guided to their goal of naturalization, and 125,262 made applications to file declarations of intention, through the good offices of this Service. The basic purpose of the Citizenship Education Program is to build for good citizenship among our naturalized citizens. To this end the public schools were regularly informed of aliens who were possible students for adult education; and citizenship textbooks were furnished the classes.

The pages that follow record the year's work; our accomplishments; our adjustments to new legislation; and our improved efficiency through better administrative practices.

The major legislative project of the fiscal year was continuance of work begun early in 1950 on omnibus bills having for their purpose the recodification, and in many particulars the revision of existing laws relating to immigration, naturalization and nationality. The first such bill S. 3455 was introduced in the 81st Congress on April 20, 1950. The second and third bills S. 716 and S. 2055 were introduced in the 82nd Congress on January 29, 1951 and August 27, 1951 respectively. The Service, through the Office of General Counsel, and the Department, continued active cooperation with those engaged in Congressional Committee work on this omnibus legislation. An attorney from the General Counsel's office worked virtually full time with Congressional Committee staff members. He assists in drafting revisions, preparing reports, and performing other tasks in which the experience of the Service is of value.

There were flurries of legislative activity upon various other public measures not enacted by the end of the fiscal year. Some general legislation dealing with various phases of immigration and naturalization possibly was deferred because the general omnibus bill is looked upon as likely to make some separate enactments unnecessary, or to provide a general legislative measure that can be amended to attain legislative aims, without the necessity of independent legislation.

During the fiscal year 2,108 legislative reports expressing the view of the Service on both public and private bills were drafted or approved. This may be compared with 1,963 such reports prepared during the previous fiscal year. In addition 56 items of proposed legislation were drafted as compared with 38 the previous year.

Public laws.—Of the public laws enacted during the year relating to Service functions, perhaps the most important was the Internal Security Act of 1950 (Public Law 831, 81st Congress,

effective September 23, 1950). No legislation in recent years has had greater impact on Service functions. Some provision of the statute affects almost every Service activity. The purpose of the Act is to protect the United States from certain un-American and subversive activities. The law requires, in part, that communist organizations be registered; it amends immigration and nationality laws by refining, clarifying, and augmenting the classes of persons to be considered as risks to internal security; it strengthens the administration and enforcement work of the Service in these fields; and requires of each resident alien an annual recurring report of his address.

Another noteworthy legislative development was Public Law 843, (81st Congress, enacted September 27, 1950), which exempted the conduct of deportation proceedings from the Sections 5, 7, and 8 of the Administrative Procedure Act. From February 20, 1950, the date of the Supreme Court decision in the case of Wong Yang Sung v. McGrath, until September 27, 1950, the Service conducted hearings with the full formalities required by the Administrative Procedure Act. New regulations and policies, drafted on the basis of Public Law 843, aim at a concise hearing that gets to the root of the problem in determining alienage, deportability, and eligibility for discretionary relief. At the same time, all the rights of the alien to a fair hearing are safeguarded.

Other public laws relating to work of the Service enacted during the year included the Act of August 19, 1950, (Public Law 717, 81st Congress, 2nd Session) to permit the admission of racially inadmissible alien spouses and minor children of citizen members of the United States armed forces; Act of March 28, 1951, (Public Law 14, 82nd Congress, 1st Session) to clarify the immigration status of certain aliens in relation to membership in or affiliation with certain organizations of the subversive classes; Act of March 19, 1951 (Public Law 6, 82nd Congress, 1st Session) to extend the period for the admission of alien spouses and minor children of citizen members of the United States armed forces; and the Act of June 28, 1951 (Public Law 60, 82nd Congress, 1st Session) to amend the Displaced Persons Act of 1948, as amended. The Act of August 1, 1950 (Public Law 630, 81st Congress, 2nd Session) provided a civil government for Guam, and for other purposes. It includes provisions relating to nationality of inhabitants of the Island of Guam, and authorizes the Commissioner of Immigration and Naturalization, with the approval of the Attorney General, to make and prescribe such rules and regulations not in conflict with the Act as he deem necessary and proper.

Private bills introduced and enacted.--The number of private laws dealing with immigration and naturalization matters enacted during the fiscal year was 354, compared with 202 enacted during the previous fiscal year of 1950, 23 during the fiscal year 1949, and 117 during the fiscal year 1948. The total number of private bills introduced during the past fiscal year was 2,110, of which

1,424 were introduced in the House and 686 in the Senate. As pointed out in the last annual report, comparatively few private bills are enacted into laws, the percentage as to prior years being less than ten percent. The number enacted during the past year, however -- 354 -- was almost 17 percent in relation to the 2,110 bills introduced during the same period.

Whether or not bills are enacted into law, their introduction results in many requests of the Service for reports to Congressional committees concerned. District Directors report that it is evident that a growing number of aliens arrested for illegal entry apply for private bills as soon as they are released under bond. The majority of these cases are groundless, and succeed only in delaying action, cumulating detention expenses, etc. High priority is given such cases in field investigations necessary as a basis for reports. Thus the increasing number of bills introduced in each fiscal year is becoming an exacting tax on the investigative force of the Service, and adds correspondingly to the work of the General Counsel's office in preparing reports, and in appearances by representatives of his office in hearings or proceedings upon many such bills before Congressional committees.

Prosecutions and litigations.--During the past year, the General Counsel in the Central Office and the counterpart in field offices have participated in preparation of legal memoranda and briefs, or otherwise have assisted the United States Attorneys and the Department of Justice in connection with litigation arising from the operations of the Service.

As in previous years the great bulk of litigation was in the Federal District Courts, with many decisions there being appealed to the various United States Courts of Appeals, and a continuing trend by parties adversely affected by such appeals in numerous instances to seek review by the United States Supreme Court.

During the fiscal year the Supreme Court decided the cases of McGrath v. Kristensen, 340 U.S. 162; Ackermann v. United States, 340 U.S. 193; United States ex rel Knauff v. McGrath, 340 U.S. 940, which followed in the wake of the important decision of United States ex rel Knauff v. Shaughnessy, 338 U.S. 537, decided the previous year, Jordan, District Director of Immigration and Naturalization v. DeGeorge, 341 U.S. 223; Moser v. United States, 341 U.S. 41; and the case of Molsen v. Young, 340 U.S. 880 which vacated the judgment of the lower courts upon agreement, with remand to the District Court.

Other actions by the Supreme Court during the fiscal year included denial of certiorari in the cases of Potter, U.S. Attorney, et al v. Estes, 340 U.S. 920; Klapprott v. United States, 340 U.S. 896; Mastrapasqua v. Shaughnessy, 341 U.S. 930; Obermeier v. United States and United States v. Obermeier, 340 U.S. 951; Papagianakis et al v. The Somos, et al, 341 U.S. 941; Papaliolios et al v. Durning,

PH

341 U.S. 940; U.S. ex rel Russo v. Thompson, Warden, et al, 341 U.S. 954; Slavik v. Miller, 340 U.S. 955; Smiley v. U.S. and U.S. v. Smiley, 340 U.S. 817, rehearing denied, 340 U.S. 885, supplemental petition for rehearing denied, 186 F. 2d 903; Steffner v. Savoretti, 340 U.S. 829; Visic v. Savoretti, 340 U.S. 831; Willumeit v. United States, 340 U.S. 834, rehearing denied, 340 U.S. 885.

The Supreme Court granted certiorari in the case of Bindczyck v. Finucane, 341 U.S. 919, and continued the case to the 1951-52 calendar. Other cases filed with the court for consideration and continued to the 1951-52 term include Green v. United States, petition for certiorari filed May 1, 1951 to the United States Court of Claims, 94 F. Supp. 666; Harisiades v. Shaughnessy, petition for certiorari filed May 3, 1951, to the United States Court of Appeals, Second Circuit, to revise 186 F. 2d 137; Carlson, aka Solomon Skolnick et al v. Landon, petition for certiorari filed April 28, 1951, to the United States Court of Appeals, Ninth Circuit, to review 187 F. 2d 991; and the Supreme Court on April 30 directed to the release of petitioners on bail pending disposition of petition, 341 U.S. 918; Zydok v. Butterfield, petition for certiorari filed June 22, 1951, to review United States Court of Appeals, Sixth Circuit, in 187 F. 2d 802.

The Solicitor General authorized the filing of a petition for certiorari to review the decision of the United States Court of Appeals, Eighth Circuit, in U.S. ex rel Kurt Einar Heikkinen v. Gordon, 190 F. 2d 16.

The limitations of this annual report preclude any extensive discussion of the many issues involved in the cases disposed of during the fiscal year by the Supreme Court or pending before it at the end of the fiscal year. However, one of the more active and most important of issues likely to reach the Supreme Court at its 1951-52 term, involves the authority of the Attorney General to revoke previously granted bail, or to deny original bail to aliens arrested in deportation proceedings. Since the amendment to Section 20 of the Immigration Act of 1917 (8 U.S.C. 156) by Section 23 (a) of the Internal Security Act of September 27, 1951 there have arisen approximately 50 cases in various district courts. These cases challenge the Attorney General's authority to revoke previously granted bail or to deny original bail to aliens arrested in deportation proceedings.

The issues involved are illustrated in the cases of the so-called "Terminal Island Four." This refers to four aliens, Carlson, Stevenson, Hyun, and Carlisle, who, after amendment of 8 USC 156 by the Internal Security Act of 1950, were taken into custody under warrants of arrest containing charges based on membership in the Communist Party. They were continued in custody without bond under the new statutory provision giving the Attorney General authority in his discretion to detain an alien without bond pending final deter-

mination of his deportability. The aliens applied to the United States District Court at Los Angeles for writs of habeas corpus to test the legality of their detention. The District Court, in 94 Fed. Supp. 18, on November 10, 1950, denied the petitions for writs of habeas corpus. The aliens appealed this action to the Circuit Court of Appeals for the Ninth Circuit, which in 186 F. 2d 183, on December 16, 1950, reversed the lower court and remanded the cases with directions for further action upon the petitions for writs of habeas corpus. Thereafter the District Court granted writs, conducted hearings thereon in accordance with the mandate of the Circuit Court, and on January 11, 1951, discharged the writs and remanded the aliens to the custody of this Service. The four aliens again appealed to the Circuit Court of Appeals, which in 187 F. 2d 991, on March 13, 1951, affirmed the judgment of the lower court. Thereafter the aliens filed a petition with the Supreme Court for the issuance of a writ of certiorari. The Supreme Court on April 30, 1951, made an order directing that the four aliens be released on bail pending disposition of their petitions for writs of certiorari and the litigation remains in this posture at the present time, the Supreme Court having recessed for the summer without making any further decision in the cases.

One of the effective deterrents to smuggling and kindred offenses is successful criminal prosecution. In addition to the provisions in the immigration laws whereby violators of immigration laws may be deported or allowed to depart voluntarily under administrative proceedings, there are also contained in the immigration laws, as well as in Title 18, United States Code on Crimes and Criminal Procedure, provisions for the prosecution in the courts of certain violators of laws involving immigration and naturalization matters. Prosecutions are generally instituted by complaint filed with the United States Commissioner, by indictment, or presentment of a grand jury, or by information filed by the United States Attorney.

With the cooperation of the various United States Attorneys, this Service is presenting for prosecution the cases of all smugglers and other persons criminally involved in these illicit transactions. The courts are becoming increasingly aware of the gravity of the smuggling menace, and are imposing heavier sentences on convicted offenders. For example, one of the smuggling rings broken up last year consisted of American citizens who, in cooperation with a contact in Cuba, smuggled aliens into the United States by light planes from Cuba. The apprehended smugglers, John Morgan and Marion Robinson, received prison sentences of 2 years and 18 months, respectively, and each was fined \$500. In another case, Pericle Mannerini, who had engaged in smuggling aliens into the United States over the Canadian border, was convicted and sentenced to imprisonment for three years.

The number of convictions for immigration and nationality violations increased 49 percent in the past fiscal year. During

the fiscal year ended June 30, 1951, prosecutions were instituted in 15,230 cases involving immigration matters and 393 cases involving nationality matters. Such prosecutions resulted in a total of 15,834 court convictions during the year, with an aggregate imprisonment of 3,716 years and fines aggregating \$91,469.

Ninety-four percent of the total convictions last year were made under Sections 1 and 2 of the Act of March 4, 1929, for illegal entry. Convictions were made in 358 cases for violation of nationality matters, chiefly under Section 911 of Title 18, United States Code, for false representation as a citizen of the United States.

The chart which follows shows a sharp rise in the number of convictions in the past fiscal year.

CONVICTIONS IN COURTS FOR VIOLATING
IMMIGRATION AND NATIONALITY LAWS

Writs of Habeas Corpus.—The institution of habeas corpus actions as a means of delaying deportation presents a continuing problem to the Service. Writs of habeas corpus may be granted in the Federal Courts to determine the legality of the detention of aliens in the custody of immigration officers. In the fiscal

year 1951, 49 writs of habeas corpus involving exclusion and 274 writs involving deportation were served by the United States Marshals upon immigration officers for release of aliens in their custody. During the year, a total of 394 cases had been acted upon by the Federal Courts, 57 cases involving exclusion and 337 involving deportation. In 56 of the cases, the courts sustained the writ and ordered discharge of the persons from the custody of the Service. The writs of habeas corpus were dismissed in 260 cases and in 78 cases the applications for writs of habeas corpus were withdrawn.

Under immigration laws, aliens admitted to the United States must as individuals measure up to certain qualitative standards physically, mentally, morally, and economically.

The Internal Security Act, by providing that all members of communist and totalitarian groups be excluded from entry into the United States, let the Service in for a few pretty hectic days - particularly at the Port of New York. Aliens arriving who had received passports before September 23, 1950, and who arrived after that date had to be screened for membership in the proscribed organizations. Those who had been members - even if nominal - had to be detained.

When Public Law 14 was approved March 28, 1951, the situation was improved. However, many border-line cases caused a sharp increase in the number of Board of Special Inquiry hearings, to determine whether the membership or affiliation actually was involuntary.

The Displaced Persons Act of 1948 was further amended to provide that the time within which visas might be issued to aliens for admission to the United States be extended from June 30, 1951 to December 31, 1951. The inspectional force which has been in Europe during the past two years continues to examine immigrant displaced persons before embarkation. There has been a sharp increase in the number of Board of Special Inquiry hearings because the so-called hard core cases have now been reached. This means that many aliens with physical defects have been processed. In these cases it is necessary to require the posting of a bond to guarantee that such aliens will not become a public charge in the United States.

Sheer volume, which increased by five million over the previous fiscal year, added to the normal problem of inspection of all persons arriving at the ports of the United States. As may be seen in

the table that follows, the greatest increase was in land border traffic.

Aliens and citizens arrived and examined at
U. S. ports of entry during years ended
June 30, 1950 and 1951

ENTRIES OVER CANADIAN AND MEXICAN LAND BORDERS
Years ended June 30, 1941 - 1951

Crewmen.—We have found that aliens permitted shore leave as seamen have used this method to attempt permanent entry. Thorough inspection of crewmen and carriers is made necessary, also, because of the fact stowaways must usually be assisted in effecting entry by crewmembers. In the fiscal year 1951, 57,275 vessels and 91,901 planes were inspected on arrival. The 1,713,998 inspections of crewmen on arrival last year included 949,535 aliens and 764,463 citizens.

The excluding provisions of the Internal Security Act, of course, applied to crew members as well as to other arriving aliens, so that the work of inspecting crew members was accordingly increased. There were 37,588 alien crewmen ordered held on board the vessel on which they arrived because they were found to be inadmissible to the United States.

Included in this group were 212 alien seamen who were ordered detained on board their vessels on arrival because of membership in proscribed organizations. In the cases of 12,778 other alien seamen whose membership was found, after investigation, to have been involuntary, temporary admission was authorized under the 9th Proviso. Records indicate that 3,591 alien crewmen deserted from vessels at American seaports. Seven hundred and five were Italian, 521 British, 361 Norwegian, 274 Spanish, 197 Chinese, 186 Greek, 166 Portuguese, 166 Swedish, and 104 Danish.

IMMIGRATION TO THE UNITED STATES
Years ended June 30, 1820 - 1951

Immigrants

From the beginning of our history until 1930, immigration was an important source of population growth. Since then legal numeric restrictions, economic depression, and war have reduced immigration to an insignificant factor. Since the war there has been a rising trend in immigration, due in large measure to the migration of war brides, political emigres, and other displaced persons to our country. This acceleration was sufficient to raise the number to 249,187 in the fiscal year 1950. In 1951 there were 205,717 immigrant admissions. The decrease was due to a 22 percent reduction in the number of displaced persons admitted and to a less marked decline in the number of immigrants in other classes.

IMMIGRATION TO THE UNITED STATES - BY COUNTRY OF BIRTH
Years ended June 30, 1925 - 1951

Superimposed upon the qualitative restrictions to immigration are certain other restrictions applicable to immigrants. Quotas limit immigration from countries other than those of the Western Hemisphere. Nonquota immigrants, other than those from the Western Hemisphere, are exempt from quota restrictions either by reason of professional occupation of minister or teacher, or by reason of close relationship to a United States citizen. Notwithstanding a decrease of approximately 28,000 displaced persons in 1951, the quota of 154,277 was slightly oversubscribed.

QUOTA IMMIGRANTS ADMITTED
Years ended June 30, 1925 - 1951

Displaced persons.—The Displaced Persons Act became effective June 25, 1948, was amended on June 16, 1950, and again on June 28, 1951. The Act and its amendments authorized the issuance of visas in the following numbers:

Maximum visas authorized and immigrant aliens admitted to the United States, by classes under Displaced Persons Act of 1948, as amended:
June 25, 1948 - June 30, 1951

Class of admission under Public Law 555	Maximum number of visas authorized	Total number admitted thru June 30, 1951
Total all classes.....		271,578
Section 2 displaced persons.....		249,712
Displaced persons.....	341,000	247,927
Czech refugees.....	2,000 1/	538
Recent political refugees.....	500 1/	-
Displaced orphans.....	5,000 1/	849
Adopted orphans.....	5,000	225
Venezia Giulia displaced persons.....	2,000 1/	173
Section 3 displaced persons.....		11,194
Displaced persons from China.....	4,000 1/	2,654
Polish veterans in Great Britain.....	18,000 1/	3,808
Greek displaced persons.....	7,500 1/	2,848
Greeks entitled to preference quota status.....	2,500 1/	662
Displaced persons outside of Germany, Austria, or Italy.....		1,222
Section 12 persons.....		10,672
Ethnic Germans.....	54,744	10,672
Adopted children.....		10

1/ This number of visas is authorized within the total numerical limitation of 341,000. Visas not issued to this special group may be issued to the general group of displaced persons.

During the past fiscal year, 96,515 displaced persons, including 571 adopted and other orphans, were admitted to this country, bringing the total number of admissions under the Act to 260,916. As of June 30, 1951, a total of 10,662 ethnic Germans have been admitted to the United States (2,040 in 1951) and the cases of 1,657 displaced persons in the United States had been submitted to Congress for adjustment of their immigration status under the provisions of Section 4 of the Displaced Persons Act.

The principal countries of origin of displaced persons admitted in the past year were Poland, Germany, the U.S.S.R., and Latvia.

Preferences within the quotas, which were changed under the June 16, 1950, amendments are shown below:

Total.....	<u>96,515</u>
Quota.....	<u>95,920</u>
<u>First preference quota</u>	84,136
(Persons who are farm, household, construction, clothing and garment workers, and others with special training and professional qualifications, and their wives and children)	
<u>Second preference quota</u>	340
(Blood relatives of citizens or resident aliens of the United States, and their wives and children)	
<u>Non-preference quota</u>	
Section 2.....	250
Section 3.....	11,194
Nonquota.....	<u>595</u>
Displaced orphans.....	571
Other nonquota.....	24

Quota immigration in the fiscal year 1951 exceeded the annual quotas by 2,270. As a result of the provision in the Displaced Persons Act authorizing the mortgaging of 25 percent of the respective quotas for the fiscal years 1951 to 1954 and 50 percent of the quotas for the years thereafter, more than four times as many quota immigrants came from Southern and Eastern Europe as were authorized under the quota of 24,719 for that region. Several countries, such as Estonia, Latvia, and Lithuania, with small quotas, have mortgaged half of their quotas for many years into the future.

The 2,040 persons of ethnic German origin admitted last year were born chiefly in Yugoslavia (1,132), Rumania (352), Poland (167), Hungary (107), and Czechoslovakia (86).

Other quota immigrants.—While the principal factor in the decrease in immigration was a reduction in the number of displaced persons admitted, there was also a decrease in the number of other quota immigrants. The difference may be observed in the table that follows.

Quota immigrants admitted
Years ended June 30, 1950 and 1951

	<u>1951</u>	<u>1950</u>
Total.....	<u>156,547</u>	<u>197,460</u>
<u>First preference quota</u>		
Relatives of citizens.....	5,002	6,888
Skilled agriculturists.....	445	751
<u>Second preference quota</u>		
Wives and children of resident aliens.....	4,029	4,520
<u>Nonpreference quota</u>	51,151	61,181
Displaced persons admitted under the Displaced Persons Act of 1948, as amended.....		
	95,920	124,120

Some countries were not affected by the Displaced Persons Act, and therefore, the quota fulfillment or lack of it may be an indication of the desire of persons from those countries to emigrate to the United States. Immigrants from Denmark, France, Netherlands, Norway, Portugal, and Spain practically filled the quotas of their respective countries. On the other hand, the quotas of Great Britain and Ireland, aggregating more than half of the authorized quotas of 154,277, were less than a quarter filled. As a result only three-eighths of the quota numbers of northern and western Europe were filled.

The quota for Spain was oversubscribed last year, because an Act approved June 30, 1950, provided for the relief of the sheep-raising industry by making 250 special quota visas available to certain sheep herders for one year. Under this special legislation 125 sheep herders were admitted last year.

Nonquota immigrants.—When Congress limited immigration by means of quotas it also provided for certain classes of aliens who could be admitted without regard to quotas. The nonquota immigrants may be roughly divided into three groups — (1) geographic — natives of the independent countries of Western Hemisphere; (2) professional — ministers and teachers; and (3) wives, children, and, in some instances, husbands of United States citizens.

IMMIGRANT ALIENS ADMITTED
Years ended June 30, 1940 - 1951

The change in "natives of nonquota counties", is largely due to an increase of immigration from Canada.

The special legislation which facilitated the entry of war brides into the country expired on December 28, 1948, so that wives of soldiers thereafter were admitted under the provisions of the Immigration Act of 1924, as amended. However, legislation during the past year was passed to permit the admission of war brides racially ineligible for admission. The effect of this Act may be observed in the increase in numbers of Japanese wives of citizens admitted in 1951.

NONQUOTA IMMIGRANTS ADMITTED - BY CLASSES

A comparison of the classes of nonquota immigrant admissions for the past two years is shown below:

Nonquota immigrants admitted in
years ended June 30, 1950 and 1951

	<u>1951</u>	<u>1950</u>
Total nonquota immigrants.....	49,170	51,727
Natives of nonquota countries and their wives and children.....	35,274	33,238
Husbands, wives, children of citizens.....	11,462	16,275
Ministers, their wives and children.....	733	833
Professors, their wives and children.....	457	603
Other nonquota immigrants.....	1,244	778

Number of wives of citizens

Nonimmigrants

Nonimmigrants are aliens who enter the United States for temporary periods or resident aliens returning from a temporary stay abroad. The figures below do not include such special groups as agricultural laborers, border crossers, and crewmen.

Nonimmigrants admitted
Years ended June 30, 1949-1951

	<u>1951</u>	<u>1950</u>	<u>1949</u>
Total nonimmigrants admitted.....	<u>465,106</u>	<u>426,837</u>	<u>447,272</u>
Government officials.....	20,881	13,975	13,722
Members of international organizations...	5,526	5,010	4,723

NONIMMIGRANT ALIENS ADMITTED TO THE UNITED STATES
Years ended June 30, 1931 - 1951

Government officials.—The number of government officials from Europe doubled last year because there were many more representatives of the countries within the sphere of the foreign aid programs from such countries as Greece, Germany, and Italy. This largely accounts for the high number of government officials.

Visitors.—The most important factor in the larger number of nonimmigrants was the larger number of visitors for business or pleasure. Business travellers from Europe increased by about 6,000. However, there were approximately 4,000 fewer vacationers from Europe, possibly because of money restrictions. Pleasure travel from Canada, South America, and the West Indies, however, continued to show gains over previous years. As of June 30, 1951, there were 88,176 visitors in the United States.

Students.—While the number of students admitted did not equal that of last year, the number in the United States on June 30, 1951, was about the same as it was at the end of last fiscal year. Chinese students who were admitted 1949-1950 and cannot go home now, have been something of a problem, since they are often without funds, and therefore have to be permitted to work, even though in a student status.

Students in the United States by District

Exercise of the Ninth Proviso

Aliens, except agricultural laborers.--Under the terms of the Ninth Proviso to Section 3 of the Immigration Act of 1917, the Attorney General is permitted in his discretion to admit, for temporary periods, certain persons who otherwise are inadmissible to the United States.

Applications for exercise of Ninth Proviso 1/
Years ended June 30, 1947 - 1951

Years ended June 30,	Number of applications	Disposition		Number of persons involved
		Admission authorized	Admission denied	
Total.....	19,150	18,445	705	93,030
1951.....	15,904	15,733	171	47,871
1950.....	1,068	886	182	11,916
1949.....	933	784	149	21,146
1948.....	628	551	77	6,009
1947.....	617	491	126	6,088

1/ Exclusive of Mexican agricultural laborers.

For the six months between the passage of the Internal Security Act, making membership in communist or totalitarian organizations a cause for exclusion, and Public Law 14 clarifying the meaning of membership, the Service was forced to exclude many aliens whose membership was purely nominal -- held for such purposes as obtaining work, attending schools and the like. In order to take care of this situation, aliens in this class were admitted through the exercise of the Ninth Proviso. It was for this reason that the number of applications was 15 times that of the previous year. This number included 12,778 seamen admitted.

The grounds waived in the exercise of the Ninth Proviso are shown in the following table.

Applications for exercise of Ninth Proviso,
by grounds waived and decision
Year ended June 30, 1951

Grounds waived	Number of applications	Disposition	
		Admission authorized	Admission denied
Total.....	15,904	15,733	171

Immoral classes.....	26	24	2
Subversive or anarchistic classes.....	14,933	14,882	51
Miscellaneous.....	51	32	19

The applicants sought the exercise of the Ninth Proviso in 2,454 cases as temporary visitors to receive medical treatment, to visit relatives in the United States, to attend schools, to attend conventions and conferences, to attend to business, to play in orchestras or as contract laborers. In 112 cases the applications were for border crossing privileges; in 54 cases for transits; in 77 cases for shore leave for crewmen; in three cases for students, and in 426 cases for extension of temporary stay to continue medical treatment, border crossing privileges, etc.

Agricultural laborers admitted through the exercise of the Ninth Proviso.—Included among those admitted through the exercise of the Ninth Proviso were unskilled agricultural and industrial laborers who would be subject to exclusion from the United States as contract laborers. Before importation is authorized, a showing is required that there is a need for the labor, that prevailing wage rates in the area of employment will be paid, and that American labor will not be displaced by the aliens imported.

The problem of migratory labor in agriculture was the subject of a study by the President's Commission on Migratory Labor. This Commission was created June 30, 1950. The Commission, in submitting its report to the President, recommended that: "Foreign-labor importation should be undertaken only pursuant to intergovernmental agreements. The conditions and standards of work should be substantially the same for all countries." The Commission further recommended that the administration of a foreign labor recruiting program be the direct responsibility of the Immigration and Naturalization Service.

It was not until July 12, 1951, however, that Public Law 78 was passed. Subsequently, agreements were reached with Mexico setting forth the responsibility of the respective countries, so that for the fiscal year 1951 laborers were imported through the exercise of the Ninth Proviso.

On June 30, 1950, there were 39,765 agricultural laborers in the United States. During the year 127,002 laborers were admitted for agricultural work, 3,628 aliens illegally in the United States were contracted in pursuance to an agreement with Mexico, 68,047 such aliens departed from the United States, 5,967 other cases were closed after investigation, leaving 96,381 reported to be in the United States on June 30, 1951. The countries from whence they came were as follows:

<u>Country of last permanent residence</u>	<u>Number in the U.S. on June 30, 1951</u>
Total.....	<u>96,381</u>
Canada.....	280
Mexico.....	83,447
Bahamas.....	4,640
Jamaica.....	4,992
Barbados.....	1,984
<u>Leeward Islands.....</u>	<u>1,038</u>

Canadian woodsmen.—The program permitting the importation of skilled Canadian woodsmen under bond to guarantee maintenance of status and departure continued in effect during the year, and the need for the program still exists. At the end of the fiscal year, there were 128 individual permits in effect authorizing the importation of 9,889 woodsmen as compared with 47 permits covering 5,965 woodsmen the previous year. The increase is attributable to several factors, principal of which are the greatly increased demand for paper, lumber and other products of the woods industry, and the absorption of domestic workers into other industry where working and living conditions are more attractive. During the year eight permits were issued to applicants for the importation of skilled Canadian woodsmen into the State of New York for 645 men as compared to none the previous year. However, a great deal of timber was blown down during the past winter and a large number of laborers was required to remove it.

A time saving of at least two weeks was made between receipt of the applications to import skilled Canadian woodsmen and the issuance of the permits because of delegation of authority to issue the permits to the District Director. As a result, applicants are permitted to submit their applications two weeks later than previously.

Four violations of the terms of permits to import foreign labor were discovered during the year. One was found to be of such a minor nature that no action was taken. Investigations in two cases were not completed at the end of the year. In the other case, bond in the amount of \$4,000 was declared breached by the Central Office and the penalty forfeited.

Petitions for Immigration Visas and Reentry Permits

While in most instances the applications for admission to the United States are handled by the State Department, in two instances at least the initial application is initiated through our Service. For the past 18 months the authority to pass on these applications has been delegated to the District Director in the various districts.

Petitions for immigration visas.—The Immigration Act of 1924 provides that nonquota or preference-quota status may be granted to certain near relatives of citizens of the United States. In order to obtain such status, the United States citizen must file with this Service a petition for the issuance of an immigration visa (Form I-133) accompanied by proof of his citizenship, his relationship to the beneficiary, and other facts. If, after examination, the petition is approved, it is forwarded to the Department of State for transmittal to the appropriate American Consul. The members of our armed forces stationed abroad contributed to the large number of visa petitions filed during the fiscal year. After they were married in foreign countries they applied for nonquota visas for their alien wives.

During the year just ended, 25,227 new visa petitions were received; of that number 23,227 visa petitions were approved, 495 were rejected, and 19 approvals were revoked.

Reentry permits.--Section 10 of the Immigration Act of 1924 provides that resident aliens who have been lawfully admitted for permanent residence who depart for a temporary visit abroad may obtain reentry permits to facilitate their readmission to the United States. The years since the end of the war have shown a steady increase in the number to apply for documents with which to travel outside the United States. The travel to European countries in particular has shown a large increase.

REENTRY PERMITS ISSUED
Years ended June 30, 1925 - 1951

During the fiscal year of 1951 a total of 58,987 applications for these travel documents were received and of this number 56,646 were approved and issued, and at the end of the year 1,371 applications were pending. Almost half the reentry permits were issued in New York.

Extensions of reentry permits were granted in 13,246 cases in 1951 as compared with 11,643 during the previous fiscal year. Nine applications for extensions were denied. There were pending at the

close of the year 331 applications for extensions of reentry permits.

Emigrants and Nonemigrants

Emigrants.--Emigrants are, by definition, aliens who depart from the United States after residence of a year or more in the United States, with the intention of remaining abroad. It will be seen from this definition that emigrant, therefore, is not the opposite of immigrant in all cases, since some aliens admitted as non-immigrants on arrival may depart after a year or more and be classed as emigrants.

The number of emigrants who departed and the principal countries to which they went are shown below.

Number of emigrants departed by country of
intended future residence
Year ended June 30, 1951

Country of future residence	Number of emigrants	Country of future residence	Number of emigrants
Total.....	<u>26,174</u>	Asia.....	<u>1,902</u>
Europe.....	<u>11,477</u>	China.....	376
Denmark.....	336	India.....	314
France.....	1,019	Other Asia....	1,212
Germany.....	1,101	Canada.....	3,202
Great Britain..	3,425	Mexico.....	1,149
Greece.....	374	West Indies....	2,897

Norway.....	576	Australia and	
Sweden.....	451	New Zealand...	497
Switzerland...	311	Philippines.....	627
Other Europe..	1,601	Other countries.	397

Nonemigrants.--Nonemigrants are temporary visitors leaving the country after a stay of less than a year, or resident aliens who are leaving for a temporary visit abroad.

During the year ended June 30, 1951, 446,727 nonemigrants departed from the United States. There were 45,444 alien residents who were returning to the United States after temporary residence abroad. Three treaty traders had return permits. The remainder, 401,280, had entered as tourists, transits, government officials, and others who were leaving the United States after stays of a few days to a year's duration.

United States Citizens Permanently Departed

United States citizens who leave a domicile in the United States for periods of a year or longer abroad totalled 57,923 last year; 46,325 of these persons were native-born citizens and 11,598 were naturalized citizens.

Immigration laws have become increasingly restrictive. Inevitably, such laws on occasion impose undue hardship on aliens. Parents of citizens, and other aliens with close ties in this country are often the sufferers of such restrictions. To ameliorate these situations, there are certain provisions in the law and regulations.

Suspension of deportation.—Section 19(c) of the Immigration Act of 1917, as amended, provides that the Attorney General may suspend the deportation of an alien who is deportable under law other than one who is deportable on charges relating to subversives, criminals, narcotics, immoral persons, and the mentally and physically deficient, if the Attorney General finds (1) that such deportation would result in a serious economic detriment to a citizen or legally resident alien who is the spouse, parent, or minor child of the deportable alien, or (2) that such alien was residing continuously in the United States for seven years or more and was residing in this country on July 1, 1948. In addition to the 156,547 quota immigrants admitted from abroad during the past fiscal year there were 1,506 aliens who became legal permanent residents through suspension of deportation under the provisions of Section 19(c) of the Immigration Act of 1917, as amended, and for whom a quota charge was made in the fiscal year 1951. Charges to the quotas of the following countries were made for these aliens by the Department of State for the year ended June 30, 1951:

Section 19(c) of the Immigration Act of 1917 requires that the pertinent facts in all cases in which the suspension of deportation is proposed shall be reported to Congress with the reasons for such action. If during the session at which a case is reported or in the next following session Congress approves by concurrent resolution the granting of suspension to the alien, deportation proceedings are thereafter cancelled and the alien is accorded the status of a lawful permanent resident of the United States. If the Congress does not pass such a resolution, the Attorney General is directed to deport the alien in the manner provided by law.

During the fiscal year 1951, 5,563 suspension cases were submitted to Congress, as compared with 4,452 in 1950 and 4,302 in 1949. Since the passage of the Act of June 28, 1940, authorizing suspension of deportation, 37,921 names have been submitted to Congress for approval, or an average of 3,447 a year. The 82nd Congress had approved 3,319 through July 31, 1951.

Displaced Persons Residing In The United States

Section 4 of the displaced persons Act of 1948, as amended, provides that 15,000 eligible Displaced Persons (as defined in that Act) temporarily residing in the United States may apply to the Attorney General for adjustment of their immigration status to that of permanent

residents, provided that they are otherwise admissible to the United States and were lawfully admitted to the United States as nonimmigrants under Section 3, or as students under Section 4(e), of the Immigration Act of 1924. Final approval rests with Congress under a procedure similar to that for suspension cases.

Those who file applications for adjustment of their immigration status are required to establish by credible evidence that they have been displaced as a result of events occurring subsequent to the outbreak on September 1, 1939, of World War II. They must prove that they cannot return to their native countries, nor to the countries of last residence or nationality, because of persecution or fear of persecution on account of race, religion or political opinions.

By June 30, 1951, 8,932 applications had been received for adjustment of status under Section 4 of the Displaced Persons Act of 1948, as amended. There were 1,657 cases approved by the Commissioner and submitted to Congress.

The grounds for denial of adjustment of immigration status under Section 4 fall into the following categories:

Total number.....	<u>782</u>
Not unable to return to country of birth, residence, or nationality; no apparent persecution due to race, religion, or political opinion.....	461
Cause for displacement did not arise from events occasioned by and subsequent to outbreak of World War II.....	21
Not a lawful entry under Section 3 or Section 4(e) of the Immigration Act of 1924.....	176
Inadmissible to United States.....	22
Entered subsequent to April 1, 1948 ^{1/}	99
Not in United States when decision was rendered.....	3

^{1/} Public Law 555 of June 16, 1950, extended the entry date to April 30, 1949. However, no applications were denied on this ground since the Amendment was enacted.

Preexamination.--Preexamination is a privilege accorded to certain aliens who are in the United States in a status other than that for permanent residence. They wish to adjust their immigration status by going to Canada to apply to an American consul in that country for an immigration visa with which to apply to the United States for permanent residence.

If the application for preexamination is approved, the alien is given a hearing to determine his admissibility to the United States. The alien must be admissible to Canada, of good moral character, and have assurance from the American consul in Canada that an immigration visa can be issued promptly. If the alien is found to be eligible for an immigration visa, he is issued a pre-examination border-crossing card to facilitate entry into Canada. During the year, 1,945 new applications for preexamination were submitted by aliens who were not subject to deportation proceedings; 1,201 applications for preexamination were approved; 156 were denied; and the authority for preexamination was revoked in the cases of 30 individuals. In the preceding year 3,805 new applications for pre-examination were received.

Exercise of the Seventh Proviso.--Aliens returning after a temporary absence to an unrelinquished domicile in the United States of seven consecutive years may be admitted by the Attorney General under the authority contained in the 7th Proviso to Section 3 of the Immigration Act of 1917, notwithstanding a ground or grounds of inadmissibility under the immigration laws. (However, it is to be noted that the Internal Security Act of 1950 contains a prohibition that the 7th Proviso shall have no application to cases falling within the purview of Section 1 of the Act of October 16, 1918, as amended).

The table which follows shows the number of applications for consideration under the Seventh Proviso finally disposed of during the past five years and the manner of disposition of such applications:

Applications for exercise of Seventh Proviso
Years ended June 30, 1947 - 1951

Years ended June 30	Number of applications	Disposition of applications	
		Admission authorized	Admission denied
Total.....	1,162	1,028	134
1951.....	140	121	19
1950.....	172	138	34
1949.....	334	306	28
1948.....	248	223	25
1947.....	268	240	28

Most of the applications for Seventh Proviso relief during the

past fiscal year arose in deportation or preexamination proceedings of resident aliens who would have been excludable criminals or mental or physical defectives, or illiterates. Practically all of the 121 cases in which favorable action was taken represented persons who, in addition to having the statutory requisite of seven years prior domicile in the United States, had established family ties in this country and had otherwise unblemished records for years past. Grounds waived in order to authorize readmission were: 22 physical or mental defects, 86 criminals, nine unable to read, and four other excludable classes.

Registry of aliens under Section 328(b) of the Nationality Act of 1940.—To obtain a reentry permit, to be naturalized, and for various other reasons, aliens need to have proof of lawful permanent entry into the United States. After the alien's record of entry is verified, a certificate of arrival or other appropriate document is issued by this Service.

An alien may make application to the Commissioner of Immigration and Naturalization for the creation of a record of lawful entry where no record exists of his admission for permanent residence. To be eligible to have a record of registry created, the alien must prove that he is eligible for citizenship, that he entered the United States prior to July 1, 1924, and has resided here continuously since, that he is a person of good moral character, and that he is not subject to deportation. When registry is approved a record is created establishing the alien's admission for permanent residence as of the date of his entry. During the past year 4,547 applications for registry were received, and 3,242 records of registry completed.

"Enforcement" of the laws entrusted to this Service may well be termed the keynote of the year's work. The increasing stress on enforcement has been gradual but constant in each of the past several years, for two principal reasons: The crescendo of communism with its devious schemes of infiltration, has made enforcement for internal security of primary importance. This past year the Internal Security Act gave specific directives for the conduct of the Service toward communist aliens and members of other totalitarian groups who are in the United States or who seek to enter.

The second major enforcement problem is the perennial one of the Mexican migrant laborers who enter illegally. They have come in wave upon wave like the tides of the ocean, fluctuating with each season's agricultural work, receding as apprehensions and voluntary departures take place and rolling in again with each new cycle of agricultural work.

Joined to these two major problems are many other related ones. Smuggling is commanding considerably higher prices in recent years. This makes the practice more attractive to smugglers. Probably the reason prices are higher is that there are many Europeans in nearby countries who wish to come to the United States, and for whom there are no quota numbers. Since a stowaway can scarcely get into the country without the help of crewmen and others who protect him, he too, represents a smuggled alien.

Section 23 of the Internal Security Act amended Section 20 of the Immigration Act of February 5, 1917, and thereby brought about some drastic changes in the duties and responsibilities connected

with enforcement work. These will be related in the various types of work of enforcement reported here.

Border Patrol

The Border Patrol is the nation's police organization responsible for protecting our long frontiers against the illegal entry of aliens. It is the only such protection that the country has.

Never before has our country been more greatly endangered by the clandestine entry of so many aliens. The path worn by illegal entrants has readied a smooth road for dangerous aliens to travel. Many of them have been found to be professional criminals. Others are subversive. Many are susceptible to communist influence because of their exploited and depressed economic situation in their own countries, and in many instances, in the United States after their arrival. From any point of view, those who seek admission in this manner are highly undesirable.

DEPORTABLE ALIENS APPREHENDED BY BORDER PATROL OFFICERS
Years ended June 30, 1941 - 1951

(1) Smugglers apprehended.—Smuggling has not escaped inflation. Mexican workers who formerly paid a few pesos for the services of a smuggler now pay as much as \$100. The price for smuggling Europeans and Chinese has been known to be as high as \$1,000 or \$1,500 per person. The increased prices for smuggling made it more attractive and hence more important to stop. During the past fiscal year 811 smugglers of aliens were apprehended.

Smugglers who flew Chinese from Cuba have been arrested in California, and Italians who landed at Mobile have been located in Detroit. The Canadian border and the West Indies are providing the gateway for growing numbers of illegal entries into the United States. Surveys have shown that there are in Canada substantial numbers of Italians, Greek, and Macedonians seeking entry.

Entry of stowaways smuggled in by crew members is on the increase, too. To meet this situation, Patrol units in the Baltimore and Philadelphia Districts were added, during the past year, to the station already established in New York City. The chief task of these units is to search vessels for stowaways, and to patrol waterfront areas in order to prevent illegal entry.

SMUGGLERS OF ALIENS APPREHENDED BY BORDER PATROL OFFICERS
Years ended June 30, 1925 - 1951

(2) Others apprehended.—The Border Patrol's primary activity, that of apprehending aliens unlawfully entering, or unlawfully in the United States, reached a new high and culminated in 510,355 apprehensions. The illegal entry of Mexican nationals is our largest and most vexing problem in terms of volume. Ninety-eight percent of the apprehensions are of Mexicans entering illegally in the Mexican border districts. These illegal entrants no longer stay in the localities close to the border, but have spread over much of the Nation. Details of officers, in places as remote from the Mexican border as Chicago, and Yakima, Washington, have apprehended hundreds of illegal Mexican aliens. However, it was also necessary during several months of the year to make major shifts of officers to meet great influxes of aliens along the Mexican border.

Many Mexican nationals who are apprehended and returned immediately to Mexico, have no place to go and no means of livelihood, so they again enter the United States illegally. To discourage this practice, the airlift program described elsewhere in this report, was devised to fly aliens to points in Central Mexico near their homes. The immediate effect of the airlift was to diminish the number of apprehensions because the source — the pool — from which they came had been diminished. This fact is now enabling the Border Patrol to process, fingerprint, detain, and dispose more effectively of aliens apprehended.

(3) Cooperation with and from other officers.—During the past fiscal year, the Border Patrol apprehended 385 violators of other than immigration laws relating to border violations; 137 of them were for violations of the customs laws. Seized contraband and vehicles were valued at \$261,160. The Border Patrol contributed to the drive against narcotics use by the seizure of quantities of narcotics valued at \$42,411.75. In the Laredo, Texas area alone 673 pounds, 11½ ounces of marijuana were seized from June 1950 to mid-April 1951. This gives an indication of the source of vast quantities of this narcotic which have been discovered by the Bureau of Narcotics and police officers all over the nation.

(4) Airplanes and radio.—The Border Patrol has a fleet of twelve planes used for patrolling, sign-cutting, and general scouting duties. During the past year hundreds of aliens were apprehended by airplane-jeep patrolling wherein the plane radios to a ground team the location of aliens seen from the air.

During the year provision was made for establishment of FM radio the entire way across the Mexican border. Most of the equipment has now been installed. In the areas where the change has been made from the standard AM, the Border Patrol has almost perfect static free reception. With increased use of planes and coordination of automobile and jeep patrols along the border, efficient use of radio is absolutely necessary.

(5) Border Patrol Training School.--The Border Patrol Training School was transferred from El Paso to New Mexico A & M College near Las Cruces, New Mexico, temporarily, pending construction of suitable quarters for the school at El Paso. New Mexico A & M offered the only facilities in the area for classes of Border Patrol recruits up to 150 to 200 men each. Recruiting problems and the dire need for an increase in force made this necessary. The Border Patrol suffered severe depletion of force during the year through numbers of trained men being assigned to other branches of the Service.

(6) Deaths in line of duty.--During the year two officers were killed in line of duty, one being Pilot Michael T. Box, the other being Patrol Inspector Richard D. Clarke. Inspector Clarke was stabbed to death by an alien at El Paso, Texas. In the operation of the air patrol, Pilot Michael T. Box lost his life in a crash near El Paso, Texas. Pilot Box had furnished ground patrol teams the location of 15 aliens who were apprehended a few minutes before motor failure caused him to crash to the ground from the altitude of about 150 feet. This brings the total of officers who have met death in line of duty to 44, eight of them since World War II.

Investigations

During the fiscal year just closed, the investigative activities and responsibilities of the Service reached a new peak. Increased international tension, coupled with the armed conflict in Korea, demanded increased vigilance against aliens who threaten internal security. The Internal Security Act of 1950, by expanding the grounds for exclusion, expulsion, denial of naturalization and denaturalization, created the need for many new investigations.

In addition, the wealth of information from other agencies and from our own sources made necessary new specialized projects to search into, classify, assemble and disseminate relevant facts. The Investigation Section in the Central Office is the clearing house for information of all sorts directly affecting the enforcement operations of the Service. Through this focal point all manner of intelligence is disseminated to the Field, usually in the form of lookout cards which can be uniformly maintained in all Field Offices. During the past year, 6,511 lookouts were posted, as compared with 2,616 during the preceding year. The sum of the factors outlined above resulted in a sharp rise in investigative work, as shown by a comparison of the statistics for the fiscal years 1950 and 1951.

	<u>1951</u>	<u>1950</u>
Cases on hand at opening of fiscal year.....	38,462	40,043
New cases received during fiscal year.....	266,153	236,483
Investigations completed during fiscal year....	256,990	238,064
Backlog at close of fiscal year.....	47,625	38,462

To meet this increased investigative work-load, additional persons were transferred to investigative pursuits. Intensive training courses were conducted at the Central Office in order to train these new investigators rapidly.

The variety and scope of investigative work make it difficult to classify into neat compartments. In general, however, the investigative activities may be summarized under three headings: (1) Anti-subversive operations; (2) Anti-smuggling and intelligence operations; (3) General operations.

(i) Anti-subversive operations.—(a) Exclusion cases.—Largely as a result of the provisions of the Internal Security Act, 2,400 aliens seeking admission were temporarily excluded, and 13,000 alien crewmen were ordered held on board their vessels pending investigations of their security status. In 156 cases the temporary exclusions were made permanent without according the aliens a hearing before a Board of Special Inquiry. This was because the excluding decisions were based on confidential information, the disclosure of which would be detrimental to the public interest. The cases of 73 temporarily excluded aliens were referred to Boards of Special Inquiry for hearing and determination of admissibility.

(b) Deportation cases.—The Act of October 16, 1918, as amended, provides for the deportation of aliens who hold subversive beliefs or who have been members of or affiliated with subversive organizations. During the past year, the 1918 Act was amended by the Internal Security Act of 1950, with the result that the proscribed classes were greatly amplified. At the same time, membership in certain organizations (notably the Communist Party) became per se a cause for deportation. This relieved the Service of proving the subversive character of the organization.

During the year just ended, 2,363 aliens were investigated to determine whether they were deportable under the 1918 Act. Warrants of arrest in deportation proceedings were issued in 74 cases on evidence produced by such investigations. Completed hearings in 157 cases were referred to the Central Office for adjudication during the same period.

One case of interest was that of Andrew Dmytryshyn. Extended hearings were held and concluded during the past year, and on June 4, 1951, an order of deportation was entered. This is the first case in which deportation has been ordered under the 1918 Act based on membership in the International Workers Order.

(c) Denial of naturalization cases.—Section 305 of the Nationality Act of 1940 prohibits the naturalization of any alien who has held certain subversive beliefs or who has been a member of or affiliated with a subversive organization at any time within 10 years

prior to filing his petition for naturalization. The Internal Security Act of 1950 amended Section 305 by greatly enlarging the types of organizations which fall within the statutory ban. During the year just closed, 359 investigations were completed in cases involving possible denial of naturalization under Section 305.

(d) Revocation of naturalization cases.—In a number of cases, evidence has been obtained that naturalized citizens are engaged in subversive activities, thereby giving rise to the possibility that they may have obtained naturalization by fraud or illegality. In such cases, investigation is conducted to determine whether the naturalization is subject to revocation under Section 338 of the Nationality Act of 1940. In addition, Section 305 of that Act, as amended by the Internal Security Act of 1950, sets up new grounds for denaturalization based upon subversive activity within 5 years after naturalization. During the past year, 1,838 investigations were initiated for possible revocation of naturalization based on proscribed conduct.

(2) Anti-smuggling and intelligence operations.—(a) Smuggling, stowaways, and deserting crewmen.—Adverse conditions abroad, the presence of many European and Oriental nationals in nearby countries, ease of smuggling by plane, and the high prices paid to smugglers have made organized smuggling a big business in recent years. To cope with this situation, a Central Office unit collects and classifies all data available concerning illicit entries, disseminates relevant information to the Field and coordinates anti-smuggling investigations. In the Field, additional investigative personnel have been concentrated at seaports and other focal points throughout the country where stowaway and other smuggling activities are likely to take place.

During the past year, 497 stowaways were detected and excluded on arrival at various seaports in the United States. There is also evidence of concerted action in bringing aliens to the United States in the guise of crewmen who, once granted shore leave, promptly desert and attempt to remain here indefinitely. Thousands of these deserting crewmen were apprehended last year.

A typical example of smuggling by ship occurred on September 26, 1950, when the S. S. BRASIL arrived at New York with 10 stowaways concealed on board. These stowaways had been furnished with seamen's clothes and documents by crew members who were part of the smuggling ring. Prompt action resulted in the detection and apprehension of 10 landed stowaways. Indictments were returned against 28 persons, including the 10 stowaways, the six crew members who assisted them, and 12 other persons who participated ashore in the smuggling conspiracy. On conviction, the ringleader was sentenced to prison for two years, and commensurate sentences were imposed on the others.

(b) False documents.—Akin to the problem of the smuggled alien is that presented by the aliens who attempt entry on the basis of forged, altered or otherwise false documents. Here again, there is evidence of organized international traffic in illicit papers. In some instances, foreign passports and other documents prerequisite to the issuance of a visa have been forged. In other cases, the foreign passports have been stolen in blank and trafficked commercially, to be filled in as required by the purchaser. In some cases, aliens have procured the execution of delayed American birth certificates on the basis of fraudulent evidence, and have then attempted reentry in the guise of American citizens.

One of the most flagrant fraudulent practices used to evade the immigration laws in seeking residence in the United States has occurred in connection with Chinese claiming the right to admission because of their relationship to United States citizens. This fraud might well be termed a Chinese school for a short cut to United States citizenship. It has been established by the admissions of Chinese applicants who sought to gain entry into the United States at the port of San Francisco during the past fiscal year, that the claimed relationship to United States citizens does not exist in fact, but that the fictitious story of relationship has been learned in a coaching school in Hong Kong. Together with an alleged mother and brother he studies about a village in China in which he was allegedly born. He learns the names of all the villagers and other details of the small village. This information will coincide with information which a Chinese whose status as a citizen has been conceded, has given to the Immigration Service upon his return from visits to China over the years. The coaching school will furnish the alleged family with photographs of the alleged husband and father. He will learn all about the alleged father's relatives; about deaths occurring in the family history; about his various trips to China from the United States.

This system is definitely established by investigations conducted in Hong Kong during the past fiscal year and the admissions obtained from applicants and other Chinese. In one recent case one of the alleged Chinese sons informed the immigration authorities at the port of arrival, of the school and the fact that he had met his alleged mother, with whom he traveled, for the first time at this school and that the alleged brother who also accompanied him had joined the alleged mother and himself at the school. When the alleged father at the port of arrival made a sworn statement that the boy was in fact his blood son, the boy told the alleged father that he was not, in fact, his son and that his blood father resided in Hong Kong. The blood father had talked to our officers in Hong Kong and was well known to them.

During the past fiscal year a total of 1,688 Chinese persons arrived at San Francisco who claimed a right to enter the United

States by reason of alleged relationship to a citizen. From the foregoing, it will be apparent that these cases are such as to require very exhaustive examination and thorough investigation because of the possibility that the claim of relationship may be fraudulent. The entire absence of any records pertaining to births, marriages, or deaths in China makes it impossible to verify any statements of such applicants on the issue of relationship from documentary sources, and the decisions in these cases must therefore rest almost entirely on the testimony of the principals. The burden of sifting the claims in such a large number of cases of this type is of course substantial and requires the expenditure of a great deal of manpower on the part of primary inspectors, members of boards of special inquiry, interpreters, and investigators.

(3) General operations.—Even in the field of general investigations required in the execution of the laws administered by this Service, the stress of external events during the past year created its own peculiar impact. For example, the Internal Security Act of 1950, which added to the classes of excludable aliens, precipitated a rush of advance applications for the benefits of the 9th Proviso to the Immigration Act of 1917. Each application required individual security clearance. During the past year, 2,134 such applications were received.

Similarly, the Internal Security Act amended the Alien Registration Act of 1940 by requiring all aliens to file annually a report of their current address. The number of reports received in 1951 fell short of the number of aliens required to report, and these noncompliance cases have added materially to the investigative burden of the Service. The full effect of this increase will not be manifested, however, until the fiscal year 1952. Similarly, among the aliens who did report their current address in 1951 were many who are here in an illegal status, and numerous cases for investigation are presented thereby, which will be reflected in the report for the current fiscal year.

The table which follows shows the principal types of investigations that figured prominently in the work of the fiscal year.

<u>Type of case</u>	<u>Number of investigations</u>
Total.....	<u>256,990</u>
Violation of general immigration laws.....	105,918
Violation of status of visitors, students, transits and treaty merchants.....	27,723
Suspension of deportation (under Section 19(c) Immigration Act of February 5, 1917, as amended)....	11,351
Violation of Alien Registration Act.....	29,365
Investigation of displaced persons.....	2,309
Investigation of parolees.....	5,776
Subversive aliens (under Act of October 16, 1918, as amended).....	2,363
Naturalization investigations	
Revocation of naturalization.....	1,261
Petitions for naturalization.....	6,236
Other naturalization cases.....	7,358
Smuggling.....	1,715
Miscellaneous.....	55,615

Alien Parole

There continued to be an increase in the number of transactions involving persons under deportation proceedings who are released under authorization of 8 CFR 150.6, pending final disposition of cases. These include (1) those whose deportation cannot be effected because travel documents cannot be procured; (2) persons released pending hearing or decision or result of appeal; (3) those for whom transportation arrangements could not be immediately completed; and (4) those with private bills pending. There has also been a substantial increase in the number of persons who stand excluded from the United States. These people are paroled to permit the adjustment of immigration status, to defend criminal prosecution, to testify in criminal cases for the Government, to apply for registry and similar circumstances where the case is exceptionally meritorious and immediate deportation could be inhumane.

Prior to the passage of the Internal Security Act, parole meant aliens at large on bond or personal recognizance. Many aliens had been on such parole for years (usually because deportation could not be effected). Section 23, of the Internal Security Act of 1950, however, provides for the detention of arrested aliens or their release on bond or conditional parole pending final determination of deportability, and for six months thereafter. If deportation has not been effected within those six months, the alien becomes subject to parole supervision to control his conduct, associates, and activities. The penalty for violating conditional parole is return

to detention. Wilful failure to comply with the restrictions of parole supervision is a felony.

In June 1950 there were 11,237 persons on parole. During the fiscal year under review 13,132 aliens were placed on parole, while 9,002 were removed from parole, thus leaving a net figure of 15,271.

The chart below shows the number of aliens on parole each month, and points to the effect of the Internal Security Act on parole procedures.

ALIENS ON PAROLE

Years ended June 30, 1950 and 1951

Thousands

The number placed on parole during the year rose in an almost constant upward curve from a low of 379 during July 1950 to 1,690 during June 1951. During the fiscal year 1950 the largest number placed on parole was 1,521 in November 1949, with an average per month of 947. The change from very little parole supervision to the present law requiring supervision of much the same nature as that of the Probation Officers or Parole Officers of the various States has necessitated the creation of entirely new organizational units for enforcement of the parole provisions of the Internal Security Act. Due to the very magnitude of the task and the small force so assigned, there are still approximately 15,600 cases to be brought under the parole supervision required by the Act. Present indications are that this backlog will be overcome during the present

fiscal year, so that the Service should enter the fiscal year 1953 with practically every alien under proceedings either detained at Service expense, or under parole supervision.

New duties and responsibilities which increase the degree of control over the conduct and activities of aliens on parole are: conditions of parole, coordinating work with parole supervisors (persons outside the Service), receiving the personal and written reports of the parolees, and presenting cases for violation of parole conditions or for failure to depart.

Detentions

The Internal Security Act, making membership in communist and other totalitarian groups a cause for exclusion, immediately made necessary the detention of large groups of aliens pending a determination of their status. Under this Act, also, more deportable aliens are required to be kept in detention until they can be deported. Last year the Service, for a brief period, was able to transport illegal Mexican aliens by air to places near their homes in central Mexico. To do this the apprehended Mexicans had to be held in detention quarters until they could be assembled and transported by plane.

To provide proper care for the increase in the number of aliens in detention, which was expected following the passage of the Internal Security Act of 1950, a survey of Service facilities and personnel was made. As a result, 65 additional Security Officers were appointed in the New York, Los Angeles, and Boston districts and authority was granted for the appointment of others at Seattle whenever required in that area.

Since November of 1950, officials responsible for the operation, maintenance, and administration of each detention facility have been meeting once a month to discuss their problems. These meetings are proving effective in promoting economy, efficiency, and stability in a period of rapidly changing market conditions and emergency situations.

The entire Security force of 375 men is now dressed in a smart green uniform which compares favorably with the uniforms worn by Immigrant Inspectors and Border Patrol.

A manual to meet the needs of the detention facilities is in preparation. This will include a revision of existing operating practices and procedures, detailed instructions for the culinary service, and uniform standards to be maintained throughout the Service with respect to the care and treatment of aliens.

The report on detentions this year covers (1) aliens detained, (2) economies effected in detention facilities, and (3) a description of the detention facilities.

MANDAYS OF DETENTION IN SERVICE AND OTHER
OPERATED FACILITIES
Year ended June 30, 1951

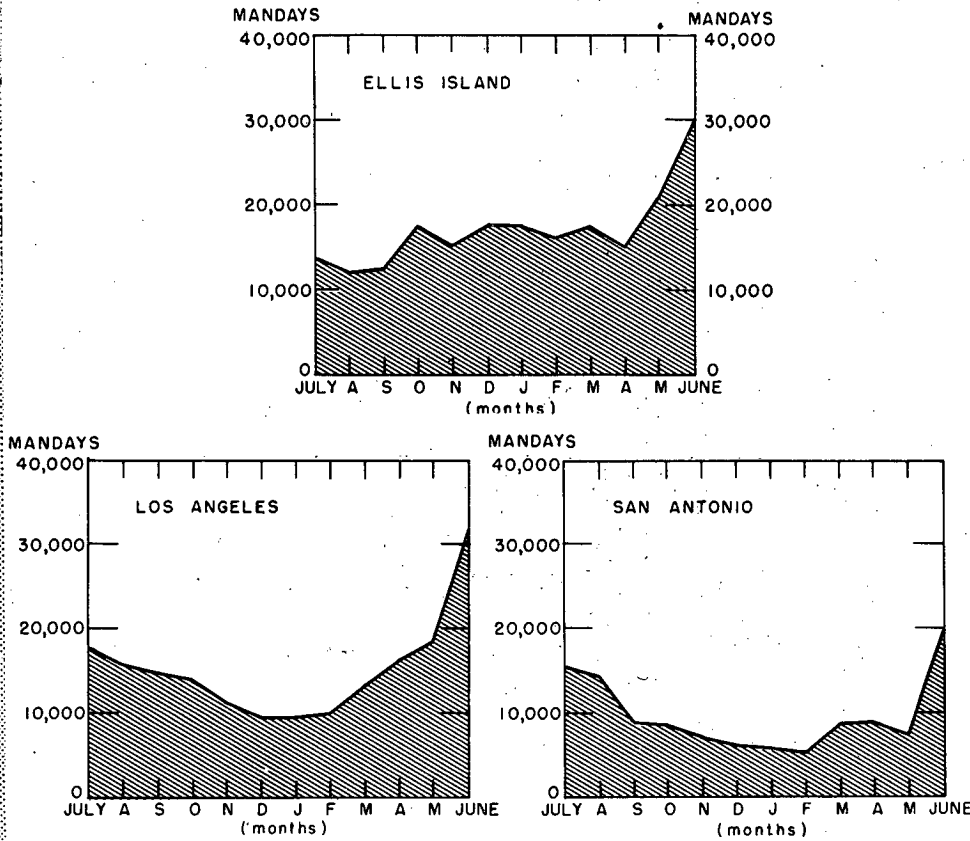

(1) Aliens detained.—Last year the number of aliens detained increased by about 27 percent over the previous year; however, the average number of man-days detention did not materially increase in spite of the mounting difficulties in procurement of travel documents, and in returning excludable and deportable aliens to foreign countries.

Aliens detained and average days detention
Years ended June 30, 1949-1951

Years ended June 30	Total	In service- operated facilities	In non-service- operated facilities
1951:			
Number of aliens detained	124,187	48,627	75,560
Average days detention...	6.55	9.19	4.85
1950:			
Number of aliens detained	97,710	38,515	59,195
Average days detention...	6.87	10.64	4.43
1949:			
Number of aliens detained	102,523	49,261	53,262
Average days detention...	7.50	9.98	5.20

MANDAYS OF DETENTION (BY MONTHS)

Year ended June 30, 1951

Following the passage of the Internal Security Act, the population at Ellis Island increased from approximately 400 to 1,200 within 90 days. Indications are that the population may reach 1,500 as a result of the necessity for detaining aliens under deportation proceedings, as authorized by the Act.

In the Los Angeles and San Antonio Districts, the sharp increase in man-days detention shown in the charts above in June, are due to the detention of aliens at El Centro, California, and Brownsville, Texas.

(2) Economies effected.—Although the Cost of Living Index of the Bureau of Labor Statistics indicates a rise in food costs during the last calendar year of 10 percent, per capita food costs in Service detention facilities were held to 8.3 percent above the figure for the previous year. At the close of June 1950, per capita food costs were 54 cents a day; as of the close of the fiscal year just ended they had risen to 58.5 cents.

An adjustment in daily rates has been agreed upon effective July 1, 1951, between the Bureau of Prisons and the Immigration and Naturalization Service, whereby each agency will pay the other actual unit cost of holding aliens in penitentiaries or United States

prisoners in detention facilities. For many years, under a reciprocal agreement, this Service paid a flat rate of 75 cents to the Bureau of Prisons, while the latter paid us \$1.00 per person for these services. Under the new arrangement the average unit cost to each agency will amount to approximately \$3.00 per day.

For the fiscal year ended June 30, 1951, 1,237,460 meals were served at the following detention Service facilities:

Detention facility	Number of meals furnished	Detention facility	Number of meals furnished
Ellis Island.....	586,484	El Centro <u>3</u> /...	38,640
San Francisco.....	203,889	*Honolulu.....	20,376
San Pedro.....	174,162	*Boston.....	30,972
Camp Elliott <u>1</u> /.....	122,367	*Seattle.....	15,252
Camp Gillespie <u>2</u> /...	45,318		

1/ Closed as of January 15, 1951.

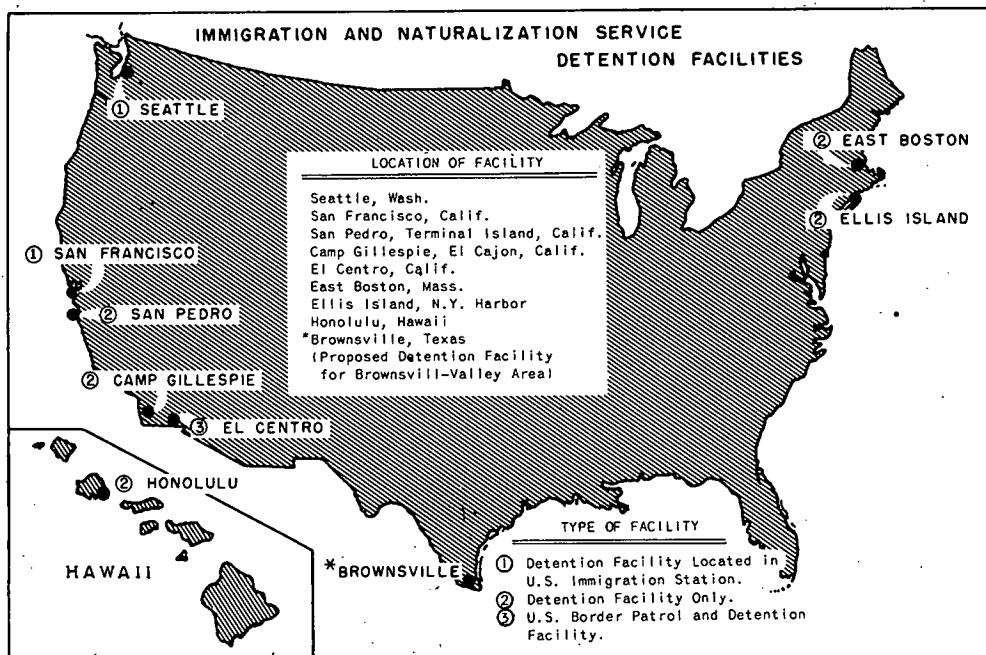

2/ Opened as of March 8, 1951.

3/ Reopened June 1, 1951.

* No Service-operated culinary staff in facility. Meals are furnished by local restaurants under contract.

In addition to meals served in Service detention facilities, more than 25,000 meals and box lunches were furnished to aliens in transit to deportation points.

(3) Detention facilities.—Detention facilities vary in terms of the purpose they serve, and also in the adequacy of the facilities to meet the purposes. There are eight service facilities. Most of them, as may be seen in the map below, are at the seaports of entry.

(a) Ellis Island.--Best known to the public and largest of the facilities is Ellis Island. As we have seen earlier in this report, the detainee population at Ellis Island expanded rapidly because of the Internal Security Act. This immediately posed a problem of space. Some of the space at Ellis Island had been relinquished for files storage space. When it was reclaimed for detention quarters, walls and floors were in bad shape, but they had to be used because of the emergency.

Lack of space also posed a feeding problem. The present dining room seats only 300 persons. Since aliens under warrant proceedings are served separately from passengers, this meant that meals were served practically the entire day. When 7,500 square feet of file space adjacent to the dining room has been repaired and equipped for dining space, this problem will be solved.

The fact that the Public Health Service closed its hospital on the Island in February contributed to crowded conditions. The 20-bed infirmary and Public Health medical staff immediately installed in the detention quarters did not include facilities for X-ray examination. Consequently, hundreds of medical hold cases had to be examined at one of five different Public Health hospitals in the New York area. This procedure was so slow that the group of mandatorily excludable cases totalled 125 in June, the largest number of medical cases ever in detention at Ellis Island. Through conferences with the United States Public Health authorities at New York and in Washington, it is hoped that the situation may soon be cleared.

The new school for children was formally opened at Ellis Island on May 22, 1951, with appropriate ceremonies. Its modern equipment and design received wide commendation from the press and public. This is especially gratifying since the entire construction of the school was supervised by the engineering staff of the Service at Ellis Island at a minimum cost. In May as many as 125 children were in detention; the daily average for the year was approximately 35.

Other changes and improvements have been made: rearrangement and better use of space; new paint and linoleum; a new motion picture projector; a new altar, pulpit, piano and organ for the 200 capacity chapel were furnished by the social service organizations, but the physical plant leaves much to be desired. Uncomfortable, inadequate, and inappropriate furniture is found in the rooms where passengers, persons under warrant proceedings, and their visitors must meet, or while away the waiting periods. An integrated plan adequately to equip these rooms is being prepared, so that a start can be made toward overall improvement.

Forty newly appointed Security Officers (trainee) finished a six weeks course of training at Ellis Island in June. This training school, which has been held annually for the past six years, will be extended to other Districts in order that all Security Officers may

receive uniform instruction and specialized training in their duties. The scope of in-Service training for employees at Ellis Island was enlarged when this Service participated in the Bureau of Prisons School of Cooking which was held in March and April at the National Training School for Boys, Washington, D. C. Plans have been made to enroll culinary personnel in future classes as they are scheduled in various sections of the United States.

A pocket pamphlet to be given to all detainees upon admission to Ellis Island has been prepared and will be issued shortly. Printed in eight languages, it will carry a brief message from the Commissioner and answer routine questions relative to living conditions, visiting privileges, medical, recreation and religious facilities, general administrative procedures and rules of conduct. Similar pamphlets for issuance at other Service facilities are receiving consideration.

More than 800 visitors representing educational, governmental, and religious groups, as well as members of both foreign and United States diplomatic and consular services and press inspected the facility last year. Among the visitors on one day were 250 members of the Little Congress who are employed as administrative or staff assistants to Members of Congress.

(b) Facilities on Mexican border.---The air lift of Mexican nationals, which began on June 1, necessitated the reopening of our facility at El Centro, California. This facility consists of several barracks surrounded by a 10 foot wire fence located at the rear of the Border Patrol station. Accommodations are suitable for the temporary or overnight detentions which are usual in this agricultural area. The air lift was later extended to Brownsville, Texas, from which point aliens were deported to Durango and San Luis Potosi. Contractual jails in the area, which are extremely inadequate and unsatisfactory under normal conditions, were taxed to the utmost. A Service-operated detention facility, similar to those at Camp Gillespie and El Centro, continues to be the pressing need in the Brownsville-McAllen-Valley area.

On January 15 the United States Navy reactivated Camp Elliott, located near San Diego, a portion of which had been operated as a facility for the detention of Mexican nationals for the past five years. Until March 8, when Camp Gillespie was opened at El Cajon, 15 miles north of San Diego, Mexican detainees from the Camp Elliott-San Diego area were cared for at the San Pedro and El Centro facilities and in adjacent contractual jails. Camp Gillespie, which is now accommodating approximately 200 aliens a day, has been furnished with new equipment which will be transferred to a permanent detention facility in that area at a later date. In this connection, the Service now holds title to five acres of land at Chula Vista, California, on the Mexican border, upon which it is proposed to build a combined Border Patrol station and detention facility.

San Pedro detention facility, built in 1936, has a capacity of 280. It is located on Terminal Island, 20 miles south of Los Angeles, is well located, has adequate outdoor recreation space and modern dormitory and culinary equipment. The average number of aliens detained per day for the fiscal year just ended was 176. The majority of the detainees are Mexican and the turnover is rapid because the facility is only 120 miles north of the Mexican border. It is regarded as a stopover for aliens enroute for deportation from San Francisco and farther north, or from the general Los Angeles area.

(c) San Francisco.—Detentions at San Francisco increased by approximately 18 percent, largely because of the extensive investigations necessary in cases of Chinese seeking admission. A daily average of 195 aliens, the majority of whom were Chinese, were in detention throughout the year just ended. All last year there was an average of 35 Chinese in detention who had been there for more than 90 days each. The detention quarters are on the 12th and 13th floors of the Appraisers Building, in which the Immigration and Naturalization Service offices are located in downtown San Francisco. They are not generally well planned or located for detention purposes, although well furnished. Recreation facilities are limited to separate porches, and day rooms. To offset the effects of long detention, and the lack of proper outside recreational facilities, traditional Chinese dishes are included in the menus.

(d) East Boston.—The East Boston detention facility occupies the first floor of a two story brick building owned by the Government. The quarters consist of three large dormitory style rooms suitable for housing approximately 250 male persons. There are no small rooms, in which families may be kept together, or for single women. The present dining room is adequate for the population, which averaged 28 per day in the fiscal year 1951. Recreation lawn space enclosed by a 10 foot wire fence adjoins the facility. Neither the location nor accommodations of this facility conform to Service standards of detention. An average of 28 aliens were detained per day during the fiscal year ending June 30, 1951.

(e) Seattle.—The detention quarters at Seattle have been operated on a part time basis since February of 1950 as a result of a steady decrease in the number of passengers seeking admittance to the United States from the Orient. Ample accommodations for passengers not immediately admissible, are available; warrant cases are detained in contractual jails in the Seattle area at an average cost of approximately \$1.25 per day, while the detention quarters, which have a capacity of 180, remain on a standby basis ready for immediate occupancy. The facility lacks outdoor recreation grounds, but otherwise is adequate and well located.

(f) Honolulu.—Detentions at the Honolulu detention facility were affected by the Internal Security Act, but not sufficiently to initiate emergency measures. This facility, which has adequate

accommodations for a maximum capacity of 300, is well located with considerable outdoor recreation space. Meals are furnished by a local caterer who serves Oriental and European foods according to population requirements. An average of 19 aliens were in detention per day during the fiscal year ending June 30, 1951, the majority of whom were Chinese or Korean.

The curtailment of Seattle and El Centro facilities during a period of relative inactivity resulted in direct operating savings of approximately \$50,000 for the six month period January through June, 1950. In connection with the necessity to purchase new equipment for emergency purposes at a cost of approximately \$30,000 during the fiscal year ended June 30, 1951, for Seattle, El Centro, and Ellis Island facilities, as well as for Camp Gillespie, the savings of \$50,000 effected in the previous year should be borne in mind in order to properly evaluate long range planning and operating efficiency.

Deportations and Voluntary Departures

Year by year since World War II, the volume of aliens deported or required to depart has multiplied, largely because of the spreading encroachment of Mexican illegal entrants into rural and industrial areas in the United States. It is these illegal entrants who swell the volume, particularly of voluntary departures. In the fiscal year 1951, the total reached 686,713, an increase of 19 percent over last year. Deportations more than doubled and voluntary departures were at an all time high of 673,169.

(1) Voluntary departures.—Voluntary departures are of two kinds. In the first type, (there were 14,176 last year), warrants of arrest have been issued. In some instances, deportation hearings were accorded, but it was determined not to issue orders of deportation, but to require the aliens to depart. In such transactions, the work involved is about equal to that of a true deportation. In the majority of cases, only warrants of arrest had been issued, the privilege of departure in lieu of deportation was granted early in the proceedings, eliminating a portion of the hearings procedure.

The second kind of voluntary departures comprises 98 percent of those required to depart in lieu of deportation. The procedure is to obtain a statement from the alien showing illegal presence in the United States, and requesting the privilege of departure. The granting of the privilege of departure in lieu of deportation enabled the Service to enforce the departure of 658,993 aliens who were illegally in the United States. This was many, many times the number that could have been deported under the full formal procedure.

While voluntary departure has the advantage of being less expensive, and makes it possible to complete large numbers of cases, it has been quite unsuccessful in damming the flood of illegal Mexican

aliens.

Many of those permitted to depart were "repeaters" - persons who returned time after time after having departed to towns in Mexico adjacent to the border. Effective law enforcement requires deportation with the whole process of investigations, hearings, and detention (often prolonged by appeals and further consideration). Deportation entails the further penalty of imprisonment for again returning after deportation.

Many of those permitted to depart voluntarily are not from the border area. They are unable or unwilling either to return to their home localities or to find employment along the border. Thus, they have no alternative but to face risk of arrest and deportation by reentering the United States. In an attempt to solve at least a portion of the "repeater" problem, an experimental airlift operation was inaugurated on June 1, 1951, to remove to points in southern Mexico those aliens who lived in central and southern Mexico. After a screening process to eliminate those whose homes were near the border, a total of 9,648 were flown - 5,699 from El Centro, California, and 3,949 from Brownsville, Texas, - to points 351 to 1,314 air-miles distant from the two points of departure.

While it is too soon to make final judgment, the initial success seemed demonstrated when voluntary departures of 63,160 in May decreased to 49,141 during June. The June departures were the lowest during the fiscal year except during November through February, the winter season, when work in agriculture is slow. In El Centro, the airlift thinned out the multitude of potential invaders at the border to such an extent that apprehensions were reduced to a quarter of the volume before the airlift.

(2) Deportations.--(a) Deportations effected.--When a warrant of deportation has been executed, aliens who depart either through deportation at the expense of the Government, or who depart at their own expense are included in deportation statistics. Following the World War II deportations averaged about 20,000 until last year when the number dropped to 6,628. In the fiscal year 1951, however, the number more than doubled to reach 13,544.

The very low number of deportations in the past two years is due to the following factors:

(a) The volume of illegal Mexican entries forced the Service to effect speedy removal of these aliens under voluntary departure processes. Since May, 1949, formal deportations of Mexican aliens have been limited to those of the criminal and immoral classes or to those who had previously been granted four voluntary departures.

(b) The liberalized provisions, effective July 1, 1949, of

Section 19(c) of the Act of 1917, authorizing the suspension of deportation on the basis of economic detriment to dependents or of meeting specified character and residence requirements delayed or eliminated deportations. At the same time, there were increases in stays of deportation, granted for reasons such as pending applications for pardons, and private bills introduced into the Congress to legalize the presence in the United States of persons who have been found deportable.

(c) The effect of the Sung decision was to immediately cut off numerous deportations until rehearings could be held and the deportation procedure repeated. The retarding effect of the Sung decision was removed when Public Law 843 on September 22, 1950, provided that deportation hearings be conducted without regard to the provisions of the Administrative Procedure Act. This again meant a reversal in procedures and rehearings.

(d) The inability of the Service to obtain travel documents to China and iron-curtain countries, or having obtained documents, the difficulty in arranging transportation reduced the number it was possible to deport. The Internal Security Act aggravated this difficulty by the provision that aliens could choose their country of deportation.

COMPARISON OF DEPORTATIONS - BY MONTHS

Years ended June 30, 1949 - 1951

Comparison of deportations by months during the past three years shows vividly the decrease continuing from June, 1949, brought about by the policy of initiating deportation proceedings in only certain specified cases in the three Mexican border Districts, and the drastic decrease to less than one hundred in the two months following the Sung decision of February 1950. Carrying forward into the fiscal year 1951, the slow upward trend is interrupted in September, 1950, by the enactment of Public Law 843 and the Internal Security Act.

DEPORTATIONS AND VOLUNTARY DEPARTURES
Years ended June 30, 1945 - 1951

The table below forms a basis for comparison for the last three years.

Aliens deported from the United States by country
or region to which deported
Years ended June 30, 1949, 1950, and 1951

Country or region to which deported	1951	1950	1949
All countries.....	<u>13,544</u>	<u>6,628</u>	<u>20,040</u>
Europe.....	1,537	947	983
Asia.....	238	244	225
Canada.....	1,100	737	869
Mexico.....	8,928	3,319	16,903
West Indies.....	1,071	722	346
Central America.....	163	144	152
South America.....	269	160	149
Africa.....	46	47	39
Other countries.....	192	308	374

The causes for deportation are shown below. Note that 3 times as many subversives were deported - due to the provisions of the Internal Security Act as were deported in 1950.

Aliens deported from the United States by cause
Years ended June 30, 1949, 1950, and 1951

Cause	1951	1950	1949
All causes.....	<u>13,544</u>	<u>6,628</u>	<u>20,040</u>

Likely to become public charges.....	14	38	20
Subversive or anarchistic.....	18	6	4
Miscellaneous.....	160	109	149

(3) Acceptance of deportees by foreign countries.—Deportation is frequently impeded because travel documents that will assure the alien's admission to the country to which deported cannot be obtained. Territorial changes, strict rulings on expatriation, and the entry of stowaways and other aliens without passports are some of the reasons why consular or diplomatic officers are unwilling to issue the necessary papers.

The Internal Security Act of 1950 added a number of options regarding the place of deportation and also provided for prosecution in some cases when aliens ordered deported failed or refused to depart from the country.

Under this Act, the first option regarding the place of deportation will be to the country specified by the alien "if it is willing to accept him into its territory". When an alien specifies a country for deportation other than the one of which he is a native or national the country chosen has no obligation to accept the alien. While there are sometimes valid reasons for an alien to specify a country other than his own, it often appears to be a choice made for the purpose of delaying deportation.

Canada is specified by noncitizens of that country more often than any other one country. Canada has not granted permission for entry in any of the 325 cases in which that country was the first option of deportees.

The procedure described above often makes it necessary to seek travel documents from two or more countries before deportation can be accomplished.

Travel documents for China, and the iron-curtain countries of Europe are practically impossible to obtain. Even the possession of travel documents is not an assurance that an alien will be accepted as a deportee - even that he will be permitted to leave the United States, as the Polish consular authorities have had aliens removed from the Polish-operated steamship "Batory" after they were placed on board by this Service for deportation to Poland. The opportunity for the Service to accomplish even such "near-deportations" ceased in the fiscal year 1951 when the Polish Government withdrew the "Batory" from the Gdynia-New York run, and the sole commercial competitor also withdrew its service.

The Visa Division of the Department of State has continued its generous cooperation with this Service, in trying to get travel documents through diplomatic channels when they cannot be obtained through foreign consular offices. Pending and new cases referred through the Department of State last year equalled 538. One hundred seven cases were disposed of as follows:

The transportation of deportees to overseas countries was often possible through the use of the Military Sea Transport Services. Deportees have gone from New York to England, Germany, Greece, Italy, Trieste, and Panama, and from San Francisco to the Philippines, Japan, and Korea. During the tourist season when space on vessels is not available, deportation to the Scandinavian countries is accomplished by utilizing MSTs to Germany thence air - through arrangements made by the cooperation of the German Consul General in New York in each individual case for surveillance between the port of debarkation and the airport, and for reimbursement of the German civilian authorities for any incidental expenses involved. Similarly MSTs is used for deportation to Austria and Czechoslovakia via Germany and for deportations to Yugoslavia via Trieste.

(5) Destitute aliens removed.—One hundred one aliens were removed from the United States under Section 23 of the Immigration Act of 1917, as amended by the Act of May 14, 1939, which provides for the voluntary removal of destitute aliens who applied for return to their native lands at Government expense. Aliens removed under the provisions of this Act became ineligible for readmission except upon approval of the Secretary of State and the Attorney General.

Included in those removed last year were a war bride who was accompanied by her citizen husband and family (whose passages were paid by interested persons).

Exclusions

Aliens who arrive at ports of entry seeking admission to the United States may be excluded if they fail to qualify under the immigration laws of the United States. In most instances aliens held for exclusion are given a hearing before a three-member Board of Special Inquiry. From an order of exclusion by the Board, an appeal lies to the Commissioner except in certain instances when the Public Health Officer certifies an alien to be inadmissible.

Other cases in which there is no appeal are those cases in which the excluding decision is based on confidential information, the disclosure of which would be detrimental to the public interest.

Following the passage of the Internal Security Act, 2,400 persons were temporarily excluded because of membership in proscribed organizations. In nine-tenths of the 2,400 cases of temporary exclusion, membership was nominal; the admission status was changed to that accorded by the visa after the passage of Public Law 14. To avoid prolonged detentions at ports of entry into the United States pending determination of admissibility, a force of primary inspectors has been stationed in Europe to make immigration inspections of displaced persons to be admitted. Most of the mental and physical defectives excluded were excluded before embarking from Europe.

Authorization for travel document granted.....	40
Authorization for travel document refused.....	37
Authorization for travel document no longer required.....	30

Of the 431 cases still pending, over half relate to aliens from communist countries. A smaller number of passport cases were disposed of in this year. In January 1951 the issuance of travel documents for deportees was made a function of the newly established German Consulate General at New York, and since April 1951 the German Consul at Chicago has also issued such documents, both offices dealing directly with the Service Field Offices.

Through the cooperation of the German Consul General in New York it is anticipated that there will be a number of deportations of insane to Germany during fiscal year 1952. The dossiers of 66 cases of physical and mental incompetent aliens have now been referred to the German authorities with the view of arranging for their proper care. The occupation authorities could not accept these people into Germany due to lack of institutional facilities.

Yugoslavia issued the necessary travel documents for the deportation of its nationals, including the acceptance of three mental incompetents - in this type of case, their representatives here must not only issue travel documents, but also arrange for the reception of the insane abroad, including accepting custody at an agreed-on border point. These deportations were by vessels of the Military Sea Transport Service to Trieste, where United States military authorities accomplished the delivery at the border.

(4) Transportation for deportation.—Within the United States, transportation to border points for deportation was by air coach when such a method proved cheaper than other means of transportation, including cost of detention and escort officer.

The outstanding achievement during the fiscal year in effecting the departure of aliens who were illegally in the United States was the operation of the airlift removing "wetbacks" from points adjacent to the Mexican border.

Other than to Mexico, the use of aircraft outside continental United States has been movements of individuals on regular commercial flights to points where the use of air was more advantageous than the use of steamship service. Commercial planes have been used for deportation when it was economically advantageous, notably from the West Coast to Central America and from Miami to points in the Caribbean.

One contemplated flight to return a group of East Indians to Pakistan had to be abandoned because of the introduction of a succession of Senate private bills in their behalf. This so reduced the number that the cost became prohibitive and the project had to be abandoned.

During the fiscal year 1951, 5,647 aliens were excluded from the United States, one-third of whom sought admission at the Canadian and Mexican land borders for less than 30 days. Seventy percent were excluded on documentary grounds. An increase is noted in the exclusion of criminals and mental or physical defectives. During the past year, 136 alien border-crossers and 29 other aliens were excluded on subversive grounds. Of the 29 subversive aliens excluded who were not border crossers, 14 were born in the European iron-curtain countries, eight in Canada, and seven in other countries.

Aliens excluded from the United States, by cause
Year ended June 30, 1951

Cause	Number excluded

Other classes.....	63	34	29

^{1/} Aliens seeking admission at land borders for less than 30 days.

The enactment of the Internal Security Act brought with it important changes in the requirements for naturalization.

Under this Act it became incumbent upon petitioners for naturalization to establish that they had not been members of fascist, nazi, communist, or other totalitarian organizations during the ten years immediately preceding the date for filing their petitions for naturalization. Included in this group of petitions were hundreds of "GI brides". Many of these wives were compelled to join youth organizations while attending school, and their membership was within the statutory ten year period.

Upon the enactment of Public Law 14, on March 28, 1951, defining membership or affiliation in totalitarian organizations under immigration laws, the Service took the initiative in applying such definitions to naturalization cases. Under this interpretation, only voluntary membership in such organizations precluded petitioners from being naturalized. Specifically designated as being involuntary was membership in a totalitarian organization before the applicant was 16 years of age. Thus the Service was able to recommend to the naturalization courts that hundreds of petitions be granted, in whose cases it would have been necessary to make an adverse recommendation.

Many other provisions of the Nationality Act of 1940 were amended by the Internal Security Act. For the first time in history, a petitioner for naturalization was required to be able to read and write words in ordinary usage in the English language. Heretofore he was required only to be able to speak the English language. However, persons who had resided in the United States for 20 years

and were over 50 years of age were exempted from the literacy provision in the law although they were still required to demonstrate knowledge and understanding of the fundamentals of the history, principles and form of Government of the United States. In those cases in which the applicant was subject to the literacy test, the Service directed that the examination be conducted by the use of one of four Federal Textbooks on citizenship issued by this Service. This was to achieve uniformity as well as to meet the mandate of the law that the test be conducted in simple language and that no extraordinary conditions be imposed.

The Act also for the first time brought into harmony the inconsistency that has existed between the provisions of the immigration laws directing the deportation of aliens amenable thereto and the provisions in the naturalization laws which permitted the naturalization of such aliens. The Act provided that no person can be naturalized against whom there is an outstanding order of deportability, nor can a final hearing be held on a petition for naturalization while deportation proceedings are pending against the petitioner. Careful inquiry is therefore pursued in the case of each applicant to ascertain whether or not there has been a violation of the immigration laws and whether grounds for deportation exist. Warrants of arrest are issued in appropriate cases and the petitions held in abeyance pending termination of the deportation proceedings. The naturalization of undesirable aliens and circumvention of the immigration laws is thereby precluded.

The Act also made important changes in the powers of the designated examiner conducting preliminary examinations upon petitions for naturalization by placing on an equal footing the recommendations made by that officer to the Court and the recommendation made by the Commissioner. In those cases in which the Commissioner disagrees with the recommendation of the designated examiner, both are presented to the naturalization court. The Commissioner has accordingly required that certain categories of cases presenting important issues such as membership in proscribed organizations, loyalty to the United States and good moral character be submitted to him for review after the designated examiner has reached a decision. Where the Commissioner disagrees with the examiner's recommendation, he prepares a memorandum containing the facts and issues in the case with findings and conclusions thereon which are presented to the court at the final hearing. This procedure has produced full and complete records in controversial or involved cases and has safeguarded the rights of the petitioner. It is significant, however, that only 78 petitioners, or less than one percent of those presented to the courts, were admitted to citizenship over the objections of this Service.

Certificates of arrival ---Generally, the first step toward citizenship through naturalization is to prove admission for lawful permanent residence. Because many of the immigrants who have

become residents of the United States in recent years desire to become citizens, 110,029 certificates of arrival were issued by the field offices last year.

Declarations of intention.—Except in certain cases (notably wives of citizens), the next step in the process of attaining citizenship is the filing of an application for a declaration of intention to become a citizen. The removal of the literacy requirement for older aliens enabled many who had previously been unable to qualify in that respect to file applications for naturalization. Possibly the provisions in the Internal Security Act requiring aliens to notify the Commissioner within the ten days following January 1st of their current addresses also stimulated the filing of applications to make declarations of intention, since there was a marked increase in the number of such applications filed in the last six months of the fiscal year. Applications for declarations numbered 125,262, seven percent more than the 117,435 filed last year. Declarations filed equalled 91,497, a figure slightly lower than that of last year. The decrease was due to the Field Offices' inability to process applications for declarations because of time required for investigations.

Petitions filed.—There were 61,634 petitions filed last year. This was also a seven percent reduction from last year. Applications for petitions, however, like the applications for declarations, showed an appreciable increase in the last six months of the fiscal year. This year again many wives of men in our occupation forces all over the world were permitted to join their husbands. This permission entitled them to claim the benefits of Section 312 of the Nationality Act, and many petitioners took advantage of that fact.

Petitions granted.—In spite of a definite interest in naturalization, evidenced by larger citizenship classes and more applications for declarations and petitions, the actual number of persons naturalized (54,716) was low — lower than it has been in any year since 1910. The presenting of naturalization petitioners was somewhat retarded by the additional requirements of the Internal Security Act, but the principal reason for the record low probably lies in the fact that there was a low point in the filing of declarations in 1945-1946-1947. This means that there is now (five years later) a small number of potential citizens who have fulfilled the time requirement to meet the general provisions of the nationality laws.

DECLARATIONS OF INTENTION FILED
AND PERSONS NATURALIZED

Of the 54,716 naturalized, only 14,864 were naturalized under the general provisions of the nationality law. Two-thirds of those who received certificates were persons married to citizens who were not required to file declarations, and 975 were military naturalizations, also not requiring declarations.

While the nationality laws do not distinguish between "war brides" and other spouses of citizens, it is evident that the war brides are in large measure responsible for the increased percentages of those persons naturalized who are "married to citizens."

The impulses that make immigrants choose to become naturalized citizens are many and varied; the economic advantage of citizenship as in time of war is a strong factor. People from countries with similar political traditions and the same language can be more readily assimilated than those with a different political ideology. On the other hand, those who are political and religious refugees wish to become citizens as quickly as possible. This has been demonstrated by the speed with which the displaced persons are filing declarations of intention.

The table which follows shows the principal countries of former allegiance of persons naturalized.

<u>Former nationality</u>	<u>Years ended June 30,</u>				
	<u>1951</u>	<u>1950</u>	<u>1949</u>	<u>1948</u>	<u>1947</u>
Total.....	54,716	66,346	66,594	70,150	93,904
British.....	10,867	12,697	13,284	12,361	20,328
Canadian.....	5,872	5,882	5,347	3,860	1/
German.....	5,439	6,065	5,777	7,486	10,703
Italian.....	5,975	8,743	8,301	9,452	11,516
Polish.....	3,100	3,793	4,371	5,136	6,495
U. S. S. R.....	1,830	2,122	2,752	3,143	3,562

Other.....	18,069	21,464	21,057	21,049	27,200

1/ Included with British.

Petitions denied.—Seventy percent of the 2,395 naturalization petitions denied were denied for want of prosecution. In 772 of these cases the petitioner withdrew the petition; in the remaining 908, the petitioner failed to prosecute his petition. In 105 cases the petition was denied because of lack of good moral character.

Attention was called last year to the fact that in that year only 40 petitions were denied on the ground that the petitioner failed to establish attachment to the principles of the Constitution and well disposed to the good order and happiness of the United States. In the fiscal year 1951 only 19 were denied on these grounds. However, there were 219 denials for lack of knowledge and understanding of the fundamentals of the history and the principles and form of Government of the United States. This last figure is very high in comparison to 151 in 1950 and 78 in 1949.

Seventeen petitions were denied because the petitioner was unable to write, read, and speak English. Last year, when the requirement was only the ability to speak English, there were just four denials.

One petition was denied because there was an outstanding order of deportation, and 60 were denied because the petitioner was an alien enemy, not exempt under the Nationality Act.

Naturalizations revoked.—Of the 403 judgments of naturalization revoked in the fiscal year 1951, 384 were cases in which the Foreign Service of the Department of State initiated action because naturalized citizens became residents of foreign states within five years of naturalization. Other causes for revocation are shown below.

Certificates of naturalization revoked, by
grounds for revocation
Year ended June 30, 1951

Grounds	Number
Total.....	403
Established permanent residence abroad within five years after naturalization.....	384
Failed to meet residence requirements (false allegations).....	5
Bad moral character (fraud involved).....	1
Misrepresentations and concealments relating to marital and family status.....	3
Bad moral character (no fraud involved).....	2
Dishonorable discharge following naturalization based on military service during World War II.....	2
Unwilling to bear arms (oath taken with mental reservation).....	1
Naturalization fraudulently or illegally procured.....	2
Other grounds.....	3

Loss of nationality.—In addition to those persons whose United States citizenship was revoked, there were 4,443 persons who expatriated themselves by affirmative action. Most of the certificates of loss of nationality were received from American consuls of the Department of State. The various ways of losing nationality, which are stipulated in Chapter IV of the Nationality Act of 1940 and in previous acts, and the numbers of persons are shown in the following table.

Persons expatriated, by grounds for expatriation
Years ended June 30, 1950 and 1951

Grounds for expatriation	Number of persons	
	1951	1950
Total.....	4,443	5,792
Voting in a foreign political election or plebiscite.....	1,401	1,693
Residence of a naturalized national in a foreign state (Sec. 404, Nationality Act of 1940).....	1,084	1,424
Naturalization in a foreign state.....	836	1,096
Entering or serving in the armed forces of a foreign state.....	565	721
Taking an oath of allegiance in a foreign state.....	147	369
Accepting or performing duties under a foreign state.....	73	163
Renunciation of nationality abroad.....	228	149
Departing from or remaining away from the United States to avoid training and service in the land or naval forces.....	69	109
Desertion from the armed forces.....	2	4
Other grounds.....	38	64

Special certificates of naturalization.—As a direct result of World War II a total of 1,708 applications for special certificates of naturalization, an increase of 400 over the previous year, were received this fiscal year. Most of these were submitted by persons who are required to establish their United States citizenship to an official of a foreign government in connection with the prosecution of claims for property damage incurred during the war. This year again many wives of men in our occupation forces all over the world were permitted to join their husbands abroad. This permission entitled them to claim the benefits of Section 312 of the Nationality Act of 1940, and many petitioners took advantage of that fact.

Citizenship acquired by resumption or repatriation.—Statutory authority exists for the re-acquisition of citizenship by persons who lost United States citizenship by serving in a foreign allied army during World War I or World War II, and by women who lost citizenship through marriage to aliens.

The number of former citizens who received certificates of citizenship under such conditions is shown in the table which follows.

	<u>Years ended June 30,</u>		
	<u>1951</u>	<u>1950</u>	<u>1949</u>
Total number.....	<u>1,242</u>	<u>1,219</u>	<u>2,116</u>
Persons who lost citizenship by serving in the armed forces of allies of the United States, and who were repatriated under Sec. 323, Nationality Act of 1940.....	256	275	899
Native-born women who lost citizenship through marriage to aliens and who were repatriated under the Act of June 25, 1936, as amended.....	839	773	1,040
Native-born women who lost citizenship through marriage to aliens and whose marriages terminated, and who were repatriated under Sec. 317(b) of the Nationality Act of 1940.....	145	170	177
Persons repatriated under private laws.....	2	1	-

Section 323 of the Nationality Act of 1940 specifically authorizes repatriation after service in a foreign, allied army. In addition, Section 317(c) of the Nationality Act provides an expeditious means for the naturalization of former citizens of the United States who were expatriated pursuant to Section 401(c) of the Nationality Act of 1940 by reason of service in a foreign army. Since Section 401(c) does not distinguish between service in an allied army and in the army of an enemy country, it permits persons who served

in an enemy army during the recent war to claim the benefits of Section 317(c). In such cases, many questions arise concerning attachment to the Constitution of the United States and favorable disposition to the good order and happiness of the United States. Therefore, most of such cases are reviewed by the Central Office before they are presented to the courts for final hearing. Citizenship was not conferred upon any applicant under this Section during the year.

Derivative citizenship.—The requirements of the Internal Security Act stimulated the interest in proof of derivative citizenship. During the fiscal year 1951 there were 20,695 applications by persons who claimed that they derived citizenship at some prior time through the naturalization of parents. There were 15,785 derivative certificates completed.

In addition, certificates of citizenship were issued to 4,216 persons by reason of their birth abroad to citizen parents.

Citizenship education.—The citizenship education program of the Service has been in continuous operation since 1918. The program was authorized by the Immigration Act of that year and further strengthened by the Nationality Act of 1940.

The Internal Security Act of 1950 with certain exceptions strengthened the requirements for naturalization by making the ability to read, write and speak English a prerequisite to naturalization. In addition, the candidate for naturalization must not only know and understand the principles and form of Government of the United States, but must also have knowledge of its history. The citizenship education program consists of: cooperating with public schools through editing and distributing citizenship text books for use in public school classes or home study courses; through informing the public schools of potential candidates for citizenship; and by promoting meaningful naturalization ceremonies.

The statistics on the citizenship program are shown below:

Citizenship textbooks for naturalization applicants
distributed to the public schools

<u>Years ended June 30, 1945 - 1951</u>

Candidates for naturalization enrolled in all classes during the last fiscal year <u>2/</u>	76,757

1/ In addition 75,689 books were ordered, but were not distributed because they were out of stock.

2/ This information is taken from reports made by public schools at the time textbooks are requisitioned, and may be regarded as reasonably complete.

Names of newly-arrived immigrants.—During the past fiscal year all work pertaining to the preparation and dissemination of visa-name slips has been accomplished by the Field Offices of the Service, having been assigned to them on March 1, 1950. From July 1, 1950 through June 30, 1951, a total of 151,458 such slips were sent to public-school officials. They were used to notify alien naturalization candidates of citizenship education classes. The value of this program is constantly brought to the attention of the Service.

Home study program.—State colleges and universities, cooperating with this Service, conduct the Home Study Courses. Textbooks used in the course are distributed by the Service under provision of the law. This program brings to outlying districts of the United States the benefits of organized instruction in this important phase

of adult education. One such program reports enrollees from 56 foreign countries, the largest numbers from Germany, Italy, England, Poland, Canada, and Hungary. Some have been in the United States only two or three months while others have been here over fifty years. Their ages range from 17 to 80 years. Educational backgrounds range from no formal education to over six years of college work; many could not read, write, or speak English when starting the course, yet all have been aided toward their goal of citizenship.

Public-school certificates of proficiency.—The Service and courts continued to accept public-school certificates showing the satisfactory completion by candidates for naturalization of courses of study upon the basic principles of the Constitution and Government and the History of the United States. The following naturalization courts have accepted such certificates as evidence of the petitioner's educational qualifications: All Federal and State Courts in Connecticut, Massachusetts, and Rhode Island; District Courts at Philadelphia, Pennsylvania, Camden, New Jersey, and Trenton, New Jersey; the District Court at Baltimore, Maryland; Supreme Court of New York State at Niagara Falls, New York; District Courts at Detroit and Grand Rapids, Michigan, Duluth, Minneapolis, and St. Paul, Minnesota, Toledo, Ohio, and Wayne, Indiana; 37 State Courts in the State of Michigan; four State Courts in Ohio; and one State Court in Indiana; District Courts at Chicago, Illinois, and Milwaukee, Wisconsin; the District and Superior Courts at Sacramento, California; and the District Court at Albuquerque, New Mexico.

Sixth National Conference on Citizenship.—The Immigration and Naturalization Service participated actively in the Sixth National Conference on Citizenship sponsored by the Service, the Department of Justice, and the National Education Association. Meetings were held in Washington, D. C. on May 16 - 20, 1951. One entire day, May 16th, was devoted to conferences on citizenship education for the foreign-born and related matters. Discussion groups met in the Great Hall of the Department of Justice. One hundred and thirty organizations representing patriotic, civic, governmental, education, and social service groups sent more than 300 delegates to participate in the discussions. The three main topics covered in the morning keynote addresses and the afternoon discussion groups were: Naturalization Proceedings and Court Ceremonies; Education of the Foreign-born for Citizenship; and Some Present-day Naturalization Problems.

The Service again provided an exhibit which not only displayed the various parts of the Federal Textbook and graphically outlined the work accomplished during the previous year, but centered around a moving picture entitled "I Am An American", shown on a continuous projecting machine installed as a part of the display itself. This movie depicts the life of an immigrant family and their descendants

and the part they play in helping to make the United States a leading world power. Copies of the film are available upon request for loan to civic, patriotic, and other groups interested in furthering the cause of democracy.

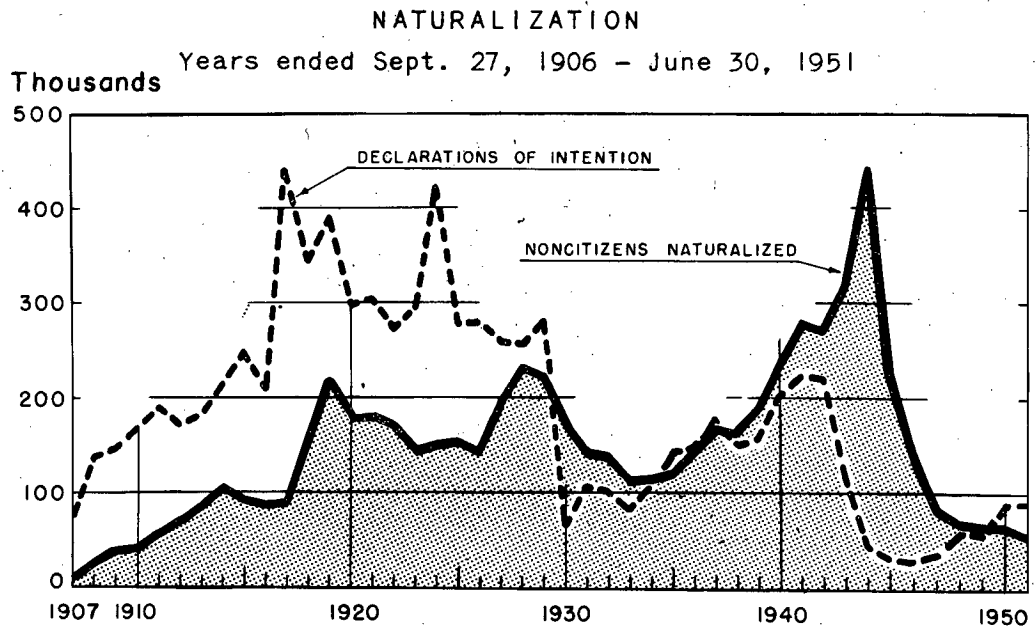

Naturalization court ceremonies.—Judges of naturalization courts have continued to arrange more meaningful naturalization ceremonies for the induction of new citizens. However, major problems in this field are recognized to exist, and were discussed at length during the Sixth National Conference on Citizenship. A committee to study the matter has been organized by the American Bar Association to look into the matter and make appropriate recommendations. Reports received by the Service, however, indicate keen interest in this phase of the work by not only members of the bench and bar, but by patriotic, civic, and other organizations who aid in making the proceedings more meaningful.

In carrying out the duty outlined in Sec. 327(c) of the Nationality Act of 1940 of promoting "instruction and training in citizenship responsibilities of applicants for naturalization," the Service has during the year issued revised editions of the two pamphlets published in 1950 "The Road to United States Citizenship" and "Welcome to United States Citizenship."

The revisions were necessitated by the 1950 Internal Security Act which requires, among other things, inclusion in the Oath of Allegiance of a statement covering willingness to bear arms or perform noncombatant service in the Armed Forces.

The "Road" pamphlet is meeting a need of our District and other Field Offices for material to distribute "over-the-counter" to persons seeking information on the steps to take to become a citizen.

The "Welcome" pamphlet is used as a memento and is usually distributed by the presiding judge to new citizens at the time of their naturalization. It has been most favorably received by Bench, Bar, the Press, and the new citizen. Because of its material contribution to the furthering of good citizenship, the Department of Justice, this Service, and former Commissioner Watson B. Miller, during whose term of office the pamphlet was first issued, were awarded Honor Medals by the Freedom Foundation. These medals are awarded annually to organizations and individuals who have made outstanding contributions to the fostering of good citizenship.

RESEARCH, STATISTICS AND INFORMATION

As in every other phase of Service work, the functions relating to appraisal of the work through research and statistical analyses and the dissemination of knowledge concerning the activities of the Service took on importance in the light of present-day events.

Digests and manuals.—Officers of this Service need to have an authoritative guide to the interpretations of law that affect their work. For this purpose 1,755 manuscript pages of new and revised text were prepared for publication. These mainly were for the Nationality and Immigration Manuals, the analytical work-books of some 2,200 printed loose-leaf pages that concisely state the substantive and procedural law from all sources on those subjects. They also were for such public information mediums of the Service as the pamphlets, "Naturalization Requirements and Procedure" and "General Information Concerning United States Immigration Laws". Additionally, in the interest of accurate public information, private publishers were assisted in bringing to date many year-book articles on nationality and immigration.

To complete the manuals 25,524 administrative and judicial decisions or opinions were examined. From these 1,327 digests were prepared, indexed, and entered into the Index Digest, an exhaustive collection of precedents that envisages the assembly behind specific fundamental titles of the substantive and procedural law from all sources.

In addition, the Congressional Record is reviewed each day. A brief resume of legislative action of interest to the Service is circulated to staff officers.

Regulations and instructions.—New legislation and changes in Service policies and procedures result in the need for amendments to the Code of Federal Regulations and the Operation Instructions. In the past fiscal year the Internal Security Act, which amended numerous sections of previously enacted immigration and nationality laws, and the legislation that removed the conduct of deportation proceedings from the operation of the Administrative Procedure Act, created a need for numerous amendments to Title 8 of the Federal Code of Regulations.

General research.—During the past year comprehensive studies were prepared of the social characteristics of recently naturalized aliens. These studies made detailed analyses of age, marital status, place of residence, occupation and the relationship of these factors to the rate of naturalization. At the end of the year studies were completed of nationals of Mexico and Italy and a study of nationals of Norway was under way. These provide valuable information for the citizenship education work of the Service.

In response to a request from the President's Commission on Migratory Labor a detailed study was prepared of Mexican illegal migrants in the United States.

During the year extended Congressional hearings were held on omnibus immigration and naturalization bills. A detailed digest of these hearings was prepared and distributed to officials of the Service.

Information.—The Monthly Review contains articles of current and lasting interest concerning the Service program. Articles interpreting new legislation and its effect on Service program, research into the meaning of the statistics of the Service, the operation of inspection as carried on at various ports, and other articles of wide variety, most of them written by members of the Service staff, are published in the Monthly Review. At the end of the fiscal year an information bulletin for the Service was in preparation. Published weekly, this news letter keeps the personnel of the Service informed of events and substantive material that is pertinent.

Inquiries keep phones ringing and typewriters clattering as aliens and citizens, alike, seek to know: how to become a citizen; how to file an immigration visa to bring an alien parent into the United States; all about Italian immigration for the past 100 years; the date of naturalization of a parent; and various other items of interest.

In the wider field of public relations, great interest has been shown in the Service, and the mass media of news releases, radio, television, motion pictures, and magazine articles were used throughout the year to keep the public informed on the Service work and the

reasons for the administrative actions taken.

Statistics.—The activities of the Service are so numerous, diversified, and complex, that it is almost impossible within the limits of this report to describe them. The magnitude of many of these activities is reflected in the tabulations which are appended to this report. The statistics, to be meaningful, must be collected in such manner as to reflect changes in law. Continuous review of new legislation and regulations resulted in twelve transmittals revising the entire punched card and coding procedures.

As in years past, immigration and nationality statistics have been collected, presented, analyzed, and interpreted during the fiscal year covering data on migration, including agricultural laborers, naturalization, derivative citizenship, expatriation, repatriation, exclusion of inadmissible aliens, the apprehension and deportation of aliens illegally in the United States, and data on the adjudicative functions delegated to the Service by law and regulations. Detailed tables on displaced persons admitted under the Displaced Persons Act of 1948 have been prepared on a monthly basis for the Displaced Persons Commission, and special tables have been prepared semi-annually on the displaced persons already in this country. Current statistics have been published periodically in the Monthly Review.

Operations reports from the Field and statistical analyses have proven of increasing value in the study and determination of administrative procedures and policies of the Service.

More than 100 Government agencies and transportation companies receive the monthly reports on alien and citizen passengers traveling by sea and air that are compiled and distributed to interested agencies. These reports are used as the official data both by the Civil Aeronautics Board and by air transportation companies at hearings before the Civil Aeronautics Board.

Public and Congressional interest in the heavy number of public and private bills dealing with immigration and naturalization which were introduced in Congress in the past fiscal year has resulted in many requests for additional detailed statistics and analyses.

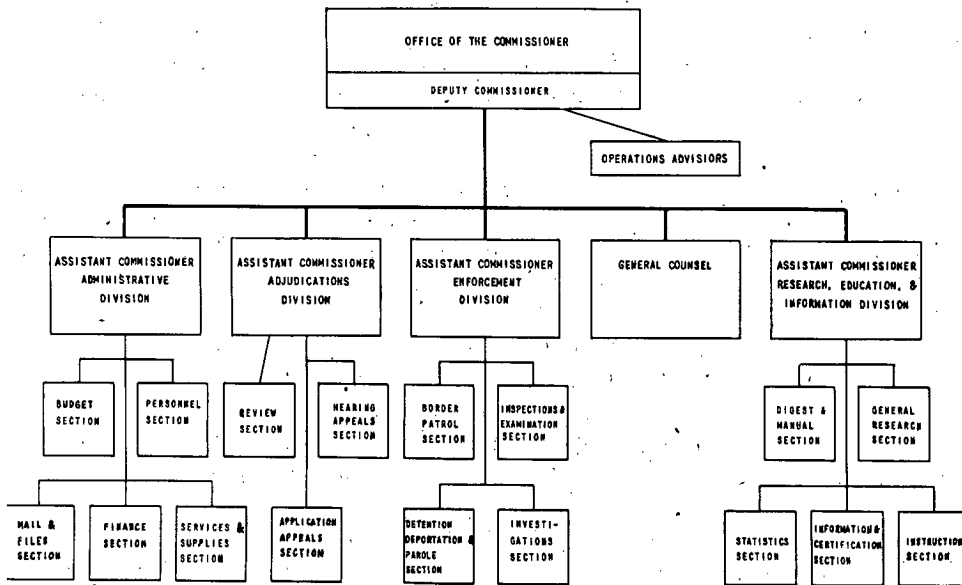

Among the statistical studies made in response to those requests were (1) the effect of the literacy requirements on immigrant admissions, (2) the volume of passengers carried on foreign and domestic carriers, and (3) analyses of United Nations proposals for collection of international migration statistics.

Other statistical work in the past year included articles for 10 standard reference yearbooks, material for talks by the Commissioner, analyses of procedural changes, analyses of the statistical needs of the Displaced Persons Commission, and the preparation of the Annual Report and tables which are appended hereto.

The increased responsibilities placed upon the Service - particularly those resulting from the Internal Security Act - affected all of the Administrative service functions of the Service. The address report required of each resident alien under the Internal Security Act; the realignment of personnel after the exemption from certain sections of the Administrative Procedure Act; the need for more Border Patrolmen, and for better equipment, made necessary greater efficiency in operation to most efficient use of employees and equipment. The ways in which these responsibilities were met are reflected in the reports that follow.

IMMIGRATION AND NATURALIZATION SERVICE
CENTRAL OFFICE ORGANIZATION

December 1, 1950

APPROVED BY: *AP Mickey*
Commissioner

Personnel

General.—On June 30, 1951, the Immigration and Naturalization Service consisted of 7,539 employees. There were 1,172 in the Central Office and 6,367 in the field. The latter group includes 109 employees stationed in Alaska, Hawaii, Puerto Rico and the Virgin Islands of the United States, 107 located in Canada and Cuba and 37 assigned to Germany to assist the Displaced Persons Commission.

Placement and training.—As a direct result of the increased responsibilities placed upon the Service, 2,533 appointments were made during the fiscal year 1951 as compared with 875 during the preceding year. As a consequence of Executive Order No. 10180, the majority of these appointments were of an indefinite or temporary nature, which did not confer civil service status.

In the Central Office approximately 7,800 interviews were conducted and 5,500 letters and memoranda were prepared in connection with placement activities. Approximately 13,600 personnel actions were processed; 9,600 concerned the Field Service and 4,000 the Central Office.

By a provision in the Supplemental Appropriation Act, 1951, Congress exempted this Service from the requirement prescribed by the Supreme Court decision of February 20, 1950, in the Sung case, that Hearing Officers in deportation hearings be appointed in accordance with Section 11 of the Administrative Procedure Act. An examination of Service employees was conducted and a nationwide list of eligibles was established from which promotions and reassignments were made to fill approximately 100 new positions as Deportation Examiner (Hearing Officer) which were established to conduct deportation hearings under the revised regulations and procedures.

The Board of U. S. Civil Service Examiners for the Immigration and Naturalization Service received and processed applicants for examinations for the positions of Patrol Inspector (Trainee) and Immigrant Inspector as follows:

Applications.....	11,291
Applications on hand at end of preceding fiscal year..	413
Applications rated.....	10,567
Placements.....	546

The training work during the fiscal year consisted of a variety of training and testing services. Two correspondence training programs are conducted. The first, a general program in immigration and nationality law, is conducted on a Service-wide basis. Twenty

lessons were in circulation at the end of the fiscal year (45 lessons are listed in the catalog). The completion of the lessons was prevented by the many procedural changes caused by the action of Congress with regard to the Administrative Procedure Act, and the wide changes in the laws and regulations caused by the Internal Security Act of 1950. Enrollees in this program completed 647 lessons during the fiscal year.

The second series is a course of study for Patrol Inspectors (Trainee) in preparation for final examination. The complete series of 11 law lessons and 15 Spanish lessons together with diagnostic tests in each subject are all in circulation as well as two booklets of study materials. Enrollees in this course completed 2,422 lessons last year.

Eight hundred and seven typing tests and 75 stenography tests were given as aids to the placement office.

The testing program in law and Spanish for probationary Patrol Inspectors was continued. Ten new tests were devised and old tests were discarded or revised. Four hundred and nine tests were furnished to the Field Offices. The index file of trainee progress was maintained and periodic reports of this progress were furnished to the Field Offices. A test in law and Spanish was devised and administered to establish a register for position of Patrol Inspector, GS-8. Five hundred and sixty-seven tests were furnished the Field Offices. Resident schools were conducted for 275 officers to instruct them in the latest laws, procedures, and methods.

In addition, varied individual and special training programs were conducted for representatives of foreign governments, other Government agencies, and this Service.

Classification and Employee Service Unit.—During the fiscal year 1951, the Budget and Fiscal Control Section of the Administrative Division of the Central Office was completely reorganized and in lieu thereof the Finance Branch and Budget Branch were established. Twenty-five new positions were approved in grades commensurate with the technical character of the work. This was a great improvement over the old fiscal set-up in which, with few exceptions, grade allocations were based largely on supervisory responsibilities.

During the same period a Tabulating Unit was approved for the Administrative Division, which included fourteen new positions in grades ranging from GS-2 through GS-11.

In the field service, due to new legislation removing the conduct of hearings in deportation proceedings from certain provisions of the Administrative Procedure Act, Hearing Examiner positions in GS-11, GS-12 and GS-13 were revised and allocations were approved as Deportation Examiner, GS-942-11, 12 and 13.

Treatment for illness, counseling on problems of health and hygiene and referrals to the Public Health Service increased 1.1% over 1950, with a total of 17,107 Health Unit treatments in 1951 as compared with 16,899 in 1950. Five thousand two hundred ninety-one sick leave applications were processed by the nurses of the Dispensary as compared with 4,589 in 1950. Six hundred fifty-four loyalty and character investigations were processed; nineteen disciplinary actions were adjudicated and appropriate action taken; fifty-six employees were retired under the provisions of Public Law 879.

All collecting and accounting for Group Hospitalization and Federal Credit Union activities, each a part of the welfare program for employees, are functions of the Employee Services Unit. During the fiscal year the Credit Union disbursed \$107,640.48 as compared with \$83,972.50 in 1950; loans to employees totaled \$87,547.89; Group Hospitalization collections amounted to \$14,668.50.

The Performance Rating Act of 1950 abolished the efficiency rating system and required each agency to submit a plan for the rating of employees based upon performance. A plan was submitted to the Civil Service Commission and was approved January 29, 1951. An interim plan was used during the rating period ending March 31, 1951. A more comprehensive plan will be installed for the rating period ending March 31, 1952. Under this plan ratings of Outstanding, Satisfactory and Unsatisfactory will take the place of the Excellent, Very Good, Good, Fair, and Unsatisfactory ratings made under the old efficiency rating system.

Finance

General.—During the first half of the fiscal year the Budget and Fiscal Control Section of the Administrative Division was reorganized, the finance functions placed in the Finance Branch and the budget functions placed in the Budget Branch. The new Finance Branch, composed of the Accounting, Settlement and Receipts Sections, began to function in February, 1951.

The Budget and Accounting Procedures Act of 1950 places upon the head of each agency the responsibility for the establishment and maintenance of an adequate and complete accounting system. The Finance Branch is now actively engaged in developing an accounting system pursuant to the provisions of the Act, to include accounting support for the budget; to produce more informative financial reports, at less accounting costs; to improve, simplify, and strengthen the system of control in line with increased effectiveness of the accounting system, and to coordinate and integrate budget, accounting, and reporting processes.

Extra Compensation under the Act of March 2, 1931.—There were

121 accountings totaling \$21,767.52 certified to the Claims Division, General Accounting Office, for claims received pursuant to the decision of the U. S. Court of Claims rendered May 6, 1946, in the Renner-Krupp cases. These cases held that employees of this Service are entitled to extra compensation as provided in the Act of March 2, 1931, for overtime services performed on Sundays and holidays in connection with the examination and landing of passengers and crews arriving in the United States from a foreign port.

Specific reports for three claims for extra compensation under the provisions of the Act of March 2, 1931, for overtime services performed as immigrant inspectors on week-days, were prepared and submitted to the General Accounting Office in accordance with their request. These claims are to be used as a basis for a decision by the Comptroller General prescribing procedure to be accorded administrative reports which may be forwarded to the General Accounting Office. These reports will attest to extra duties performed on week-days for which compensation under the Act of March 2, 1931, has not already been paid. These claims have not as yet been made the subject of a decision by the Comptroller General. Accountings totaling \$1,210.30 were prepared and transmitted to the General Accounting Office for 14 similar claims for extra compensation.

As a result of the U. S. Court of Claims decision rendered June 6, 1949, in the cases of Thomas C. Gibney, No. 48572, Joseph M. Ahearn, No. 48610 and Donald M. Taylor, No. 48611, approximately 823 individuals filed suits in the U. S. Court of Claims seeking to collect extra compensation under the provisions of the Act of March 2, 1931, for overtime services performed during fiscal year 1948. The resulting certifications for these suits total \$507,540.63, with Court of Claims' judgments in the amount of \$375,339.46 having been rendered in favor of 582 of the approximately 828 individuals who filed suits.

The U. S. Court of Claims in a decision rendered January 6, 1951, in the cases of Harry B. Greene v. The United States, No. 47418 and Glen J. Toney v. The United States, No. 47511, held that the plaintiffs, Greene and Toney are not entitled to recover under the provisions of the Act of March 2, 1931, (46 Stat. 1467 - 1468) for duties performed by them while acting as members of the Border Patrol, Immigration and Naturalization Service. As a result of this decision approximately 650 claims which had been held pending a decision in the court cases cited above, were returned to the General Accounting Office.

A total of approximately 2,200 individual claims were processed during fiscal year 1951. Certifications in the total amount of \$529,308.15 were prepared for 944 of these claims. A few were made the subject of test cases by the Comptroller General and the remaining claims were returned to the General Accounting Office without certifications either as a result of a Court of Claims decision or

because Service records did not reflect overtime services performed for which extra compensation was due under the Act of March 2, 1931.

The table below gives a comparison of accounting certified under the May 6, 1946, precedent, both to the Court of Claims and the General Accounting Office.

Net cost of operations \$33,796,913.09

Budget

A total appropriation of \$34,400,000 was made to the Service for the fiscal year 1951, an increase of \$3,171,000 over the amount available for the preceding year. The 1951 annual appropriation in the amount of \$31,400,000 was included in the "General Appropriation Act, 1951", Public Law 759, 81st Congress, approved September 6, 1950. Pursuant to Section 1214 of that Act the Bureau of the Budget set up a reserve of \$60,000 as enforced savings, representing the Service's share of the overall reduction ordered by Congress.

The fiscal year 1951 was characterized by the necessity for almost continual change in the budgetary program. At the beginning of the year the Service was commencing operation under deportation procedures newly reorganized and expanded to meet the requirements of the Administrative Procedure Act. A supplemental estimate in the amount of \$3,980,000 was pending in Congress to provide for the additional costs stemming from the lengthened and more complex procedures. Instead of appropriating funds to meet operations under the Administrative Procedure Act the Congress exempted from that Act proceedings relating to the exclusion or expulsion of aliens (Supplemental Appropriation Act, 1951, Public Law 843, 81st Congress, approved September 27, 1950). This required immediate revision of program and budget schedules.

Almost concurrently with settlement of the issue regarding the Administrative Procedure Act, the Service was faced with a new and more far-reaching budgetary problem with the enactment by Congress on September 23, 1950, of the Internal Security Act of 1950 (Public Law 831, 81st Congress). This new legislation presented operational problems of an extent which could not be immediately determined. A supplemental estimate of \$6,203,000 to meet these problems was submitted to the Bureau of the Budget. The Bureau of the Budget was sympathetic as to the additional burdens placed upon the Service but felt that fiscal expansions should be held to a minimum until the overall program had crystallized. To enable immediate operation under the more urgent provisions of the new law the Bureau of the Budget on November 25, 1950, made available an allocation of \$480,000 from the appropriation entitled "Emergencies (National Defense), Executive Office of the President, 1951". The Budget also approved submission to Congress of a supplemental estimate in the amount of \$3,250,000 for Internal Security Act requirements during the last half of the fiscal year. The Congress appropriated \$3,000,000 for this purpose (Second Supplemental Appropriation Act, 1951, Public Law 911, 81st Congress, approved January 6, 1951).

At the close of the fiscal year further revisions and adjustments in the budgetary program were imminent. On June 28, 1951, Public Law 60, 82nd Congress, extended for six months certain provisions of the Displaced Persons Act of 1948, as amended; there was also pending legislation which would require the Service to expand

its inspection program in connection with importation of agricultural workers from Mexico.

Management Improvement

Forms control.—During the year a forms control program was initiated and is now functioning effectively. The Forms Control Officer suggests improvements in design, attempts to consolidate or eliminate overlapping forms, seeks standardization of format and wording, and clears with the Bureau of the Budget where required. Changes such as snap-out or continuous forms are introduced where savings in personnel time will result. **Economies** are effected through minimizing the number of copies prepared in any one operation, as well as through avoiding the duplication of excessive quantities.

During the fiscal year 1951, 694 forms were processed. Of these, 41 were new forms, 128 were revised, and 344 approved for reprint without change; and 14 Service-wide forms and 167 Central Office forms were eliminated. Seventy-one forms were also cleared with the Bureau of the Budget.

It is planned to extend the same type of control to district forms, which are not now subject to Central Office review. It is expected that this extension of control will make it possible to eliminate many district forms and to substitute Service-wide forms.

Services and supplies surveys.—During the past year the Central Office stock-room and duplicating unit were surveyed and major reorganizations effected. As a result of the survey of the duplicating unit, procedures and forms were instituted which gave the Service an accurate and detailed picture of the costs of each duplicating job and enable the supervisor to decrease idle time of machines and personnel by scheduling work on a constant flow basis. Rearrangement of lay-out has brought better flow of work, and costs have been reduced by directing a greater quantity of work to the lower-cost machines and by using less expensive paper wherever feasible.

After the new Central Office stock-room and duplicating unit systems have been thoroughly tested and any necessary refinements completed, it is planned to make similar installations in Field Offices.

Administrative Manual and other administrative releases.—During the year there were released fifteen Administrative Manual Transmittal Memos, encompassing 193 new and revised pages of instructions and 20 exhibits. Among the releases were a new procedure, that provided better control over construction, improvement or repair of building, and major equipment purchases in the field; a revised and

improved procedure for handling files in exclusion and expulsion cases; a current index; a directory of key officials; new instructions concerning the payment of rewards and the employment of consultants; and revised procedures relating to the decentralization of files, with illustrations of the relating forms. In the Telegraphic Code a complete new series of code words covering subversive charges under the Internal Security Act of 1950 was devised and released. Work was begun to revise and bring up to date the numbered releases known as the Central Office Memo series, which dates back some 10 years and contains much obsolete material.

Work measurement.--A comprehensive analysis of the Service's work-measurement system was completed during the year and a draft of a proposed revision submitted to various Districts for comment. The proposed revision represents a considerable simplification, some ten forms and forty pages of instructions having been eliminated without the loss of any essential data. Items of work new to the field have been added to the report, work processes have been regrouped and operations and activities redefined for greater accuracy of reporting, and provision has been made for securing data on "loss time" or "idle time". Final revisions to gear the system with performance budgeting requirements are expected to be completed during the coming year.

Work-simplification.--During the year work analysis charts covering almost all of the Service's field operations were prepared in selected District Offices. Similar work-analysis charts were prepared in the Central Office for all Central Office operations. The charts were reviewed by Central Office staff and operating officials and a preliminary draft of standard process charts for all Districts was completed.

Microfilm program.--The rapidly increasing volume of Service files has made the housing and maintenance of Service records an increasingly acute problem in recent years. In addition, the present international situation makes it imperative from the standpoint of national security that duplicate Immigration and Naturalization records be available in the event of some catastrophe at the seat of government.

A microfilm program was decided to be the solution to both problems, and as the first step in that program it was decided to microfilm most of the Service's naturalization certificate files. Detailed procedures were developed, relating forms designed, cost estimates prepared, and clearances made with the Bureau of the Budget and the National Archives. Thereafter a contract was awarded under which over six million naturalization certificate files will be microfilmed by next spring. The naturalization certificate files now occupy some 12,000 square feet of floor space; the microfilm records of the same files are expected to require only 200 square feet of floor space. A negative copy of all microfilm rolls will

be deposited with National Archives for safekeeping. The program was designed to integrate the microfilm operation into the regular files operations of the Service.

At present there is being developed an overall microfilm program which will deal with all types of records in the Central Office and in all Field Offices, and which will have as its objectives the preservation of records, the conservation of space and equipment, and the assurance of copies for security purposes.

Alien address report program.—Under the Internal Security Act of 1950 each alien resident in the United States on January 1 of each year is required to report his address within ten days of that date to the Commissioner of this Service. In order to create usable records and match those records against existing files for resident aliens, a system was devised for reporting and processing which provides for maximum utilization of tabulating equipment. This necessitated the design of punched card and other forms and form letters, and the preparation of comprehensive written procedures which were used for training new employees as well as for reference. Budget estimates were prepared, processing schedules established, progress reports developed, and both quantitative and qualitative controls instituted.

By June 30, 1951, over 2,294,000 address reports had been received from aliens and a "security deck" of punched cards was available from which lists containing names and addresses of aliens of any specified nationality or at a designated geographic location could be prepared at short notice for government intelligence agencies. Lists containing the names of 120,000 non-complying aliens had been prepared from punched cards and referred for investigation. Several hundred thousand additional non-compliance cases are expected to be referred in the coming months. In addition, 56,000 cases of reporting aliens for whom no relating file could be found were referred for investigation of possible illegal immigration status.

Inventory of non-expendable property.—Work was begun during the year on a system for maintaining a perpetual inventory of all non-expendable property, such as desks, chairs, file cabinets, automobiles, etc. When completed, it is expected that the system will make instantly available data as to the location, original cost and subsequent expenditures in connection with every item of non-expendable equipment in every office of the Service.

Decentralization.—Procedures for decentralization of files were reviewed and refinements introduced to meet problems that had arisen during the year. The basic form for field request of files, a punched card form, was revised to make it easier to prepare and quicker to process, and the instructions were revised to expedite the furnishing of files in emergent cases and to meet other field operating needs. Two additional forms, the Certificate of Arrival

and the Nationality Docket Control Card, are now being prepared in the Central Office on tabulating equipment and included with decentralized files relating to newly arrived immigrants.

Space, Services and Supplies

Space.—The lack of suitable housing for our offices continues to be one of our most urgent needs. In Districts with many small ports, adequate offices for border inspections and suitable living quarters for inspectors at isolated locations are urgently needed. Over 100 building projects to relieve space problems have been recommended to the General Services Administration, but such construction is dependent upon authorization by Congress. The General Services Administration under Reorganization Plan 18 has taken over several buildings previously maintained by this Service as well as most leases covering space occupied by this Service.

New offices were established at the following locations:

Memphis, Tenn.	(Sub-office)
Little Rock, Ark.	(Border Patrol only)
Blytheville, Ark.	(Border Patrol only)
Lake Charles, La.	(Sub-office)
Hampton Roads, Va.	(Border Patrol only)

In the New York District, the Public Health Service closed the Marine Hospital on Ellis Island on March 1, 1951, and surrendered all space occupied by that Agency on June 30. The space released by PHS on Island #2 has been made available to the U. S. Coast Guard. The space released on Island #3 is being used for the storage of files. The Immigrant Building on Ellis Island is being repaired and renovated to house the Expulsion Section which is being moved from the New York office at 70 Columbus Avenue.

At New Orleans, the sub-office was moved to a new location which is more centrally located and better suited to the needs of the Service.

In the Los Angeles District, arrangements were completed to occupy additional space in the Rowan Building beginning July 1, which permits the consolidation of all District Office units in one building. Because of the Navy's reactivation at Camp Elliott at San Diego, California, the Service was required to vacate the space used there for detention purposes. A new and somewhat smaller detention facility was established at Camp Gillespie near El Cajon, California, to replace the facility at Camp Elliott.

Approximately 23,000 square feet of space was made available to the Central Office in Temporary X Building when the Department of Agriculture, Agricultural Exhibits Service, moved to other quarters.

Services.—In the Central Office improved layout and flow of work were effected for the Duplicating Unit. Included among the items of new equipment purchased was a stenafax stencil cutter, a power cutting machine and a power stapling machine. During the year 13,843,746 sheets were duplicated.

Installation of FM radio equipment was continued. Repeater stations have been placed in operation on Santiago Peak south of Los Angeles and on Mount Franklin in the El Paso area. Other repeater installations are in progress on Mount Laguna in California, Mount Lemmon in Arizona and on Bellevue Hill near St. Albans, Vt.

The Service's communication facilities have been improved and expanded by the installation of TWX (teletype) equipment in the Central Office and all District Offices except Honolulu.

The manually operated telephone switchboards in the New York District Office and on Ellis Island were replaced with automatic dial type boards which greatly improved the telephone service in these offices.

Equipment and supplies.—During the year purchase orders were issued for 161 passenger automobiles, 45 jeeps, 5 buses, 2 station wagons, 1 carry-all, 9 trucks and 4 airplanes. With the exception of the jeeps these were all replacements. Eight microfilm cameras were also purchased.

Mail and Files

The address report program imposed a heavy workload on the Central Office Mail and Files Section. During the last half of the year, working around the clock on three shifts for part of the time, the Section coded approximately 2,300,000 report cards, made 640,000 index searches, sent out over 265,000 form letters requesting additional information and filed 1,650,000 report cards. An additional 340,000 cards were filed in Field Offices. The major part of this work in the Central Office was done by temporary employees working under the supervision of regular members of the staff, and was accomplished without appreciable interference with the regular work of the Section.

The work decentralization program of the Service began to show a saving in the work of the Central Office Mail and Files Section during the year, but this saving was more than offset by increased activity resulting from the internal security program, involving a heavy movement of mail and files.

Under the files decentralization program, 549,522 files were sent to the Districts during the year, making a total of 717,725

files decentralized since the initiation of the program on March 1, 1950.

Considerable progress was made on the records retirement program during the year. Nearly one million files of naturalized persons were withdrawn from the active alien files and either destroyed or placed with the closed files. During the year 1,704 cubic feet of record material and 1,726 cubic feet of non-record material were disposed of. Nearly 15,000 cubic feet of records were placed in intermediate storage in Federal Records Centers. Work was started on microfilming of Central Office Files. A complete inventory of files and indexes in the field was completed during the fiscal year 1951, and should result in the retirement of substantial quantities of field records during 1952.

TABLE 1. IMMIGRATION TO THE UNITED STATES
1820 - 1951

From 1820 to 1867 figures represent alien passengers arrived; 1868 to 1891 inclusive and 1895 to 1897 inclusive immigrant aliens arrived; 1892 to 1894 inclusive and from 1898 to the present time immigrant aliens admitted.⁷

Other nonimmigrants.....	130	273	32	5	50

^{1/} An immigrant is defined in statistics of the Service as an alien admitted for permanent residence, or as an addition to the population. Therefore, students who are admitted for temporary periods and returning resident aliens who have once been counted as immigrants are included with nonimmigrants, although Section 4 defines such classes as immigrants.

TABLE 4. IMMIGRATION BY COUNTRY, FOR DECADES:
1820 to 1951 1/

From 1820 to 1867 figures represent alien passengers arrived; 1868 to 1891 inclusive and 1895 to 1897 inclusive immigrant aliens arrived; 1892 to 1894 inclusive and from 1898 to present time immigrant aliens admitted. Data for years prior to 1906 relate to country whence alien came; thereafter to country of last permanent residence. Because of changes in boundaries and changes in lists of countries, data for certain countries are not comparable throughout. 7

Central America.....	15,769	5,861	21,665	2,011	72,830
South America.....	42,215	7,803	21,831	3,596	146,729
Other America 15/.....	31	25	29,276	4,089	33,421
Africa.....	6,286	1,750	7,367	845	34,272
Australia and New Zealand.....	8,299	2,231	13,805	490	68,827
Pacific Islands.....	427	780	5,437	3,265	19,847
Not specified 14/.....	228	-	142	20	254,228

- 1/ Data are for fiscal years ended June 30, except 1820 to 1831 inclusive and 1844 to 1849 inclusive fiscal years ended Sept. 30; 1833 to 1842 inclusive and 1851 to 1867 inclusive years ended Dec. 31; 1832 covers 15 months ended Dec. 31; 1843 nine months ended Sept. 30; 1850 fifteen months ended Dec. 31 and 1868 six months ended June 30.
- 2/ Data for Austria-Hungary were not reported until 1861. Austria and Hungary have been recorded separately since 1905. In the years 1938 to 1945 inclusive Austria was included with Germany.
- 3/ United Kingdom not specified.
- 4/ From 1820 to 1868 the figures for Norway and Sweden were combined.
- 5/ Poland was recorded as a separate country from 1820 to 1898 and since 1920. Between 1899 and 1919 Poland was included with Austria-Hungary, Germany, and Russia.
- 6/ Since 1931 the Russian Empire has been broken down into European Russia and Siberia or Asiatic Russia.
- 7/ No record of immigration from Japan until 1861.
- 8/ No record of immigration from Turkey in Asia until 1869.
- 9/ Prior to 1920 Canada and Newfoundland were recorded as British North America. From 1820 to 1898 the figures include all British North American possessions.
- 10/ No record of immigration from Mexico from 1886 to 1893.
- 11/ Bulgaria, Serbia, and Montenegro were first reported in 1899. Bulgaria has been reported separately since 1920 and in 1920 also a separate enumeration was made for the Kingdom of Serbs, Croats, and Slovenes. Since 1922 the Serb, Croat, and Slovene Kingdom has been recorded as Yugoslavia.
- 12/ Countries added to the list since the beginning of World War I are theretofore included with the countries to which they belonged. Figures are available since 1920 for Czechoslovakia and Finland; since 1924 for Albania, Estonia, Latvia, and Lithuania; and since 1925 for Luxembourg.
- 13/ No record of immigration from Rumania until 1880.
- 14/ The figure 33,523 in column headed 1901-1910, includes 32,897 persons returning in 1906 to their homes in the United States.
- 15/ Included with countries not specified prior to 1925.

TABLE 41. PETITIONS FOR NATURALIZATION DENIED, BY REASONS FOR DENIAL
YEARS ENDED JUNE 30, 1947 to 1951

Reasons for denial	1947	1948	1949	1950	1951
Number denied.....	3,953	2,887	2,271	2,276	2,395
Petitioner failed to establish:					
Good moral character.....	439	304	233	139	105
That he is attached to the principles of the Constitution and well disposed to the good order and happiness of the United States.....	178	131	74	40	19
Knowledge and understanding of the principles of the Constitution <u>1</u> /.....	14	37	78	151	219
Ability to speak the English language <u>2</u> /.....	25	10	25	4	17
Racial eligibility to naturalization.....	1	3	-	1	1
Legal competency to take binding oath.....	-	-	-	3	1
Continuous legal residence in United States and/or State.....	25	18	21	20	14
That he is an alien, or national of the United States eligible for naturalization	73	43	36	38	45
Lawful admission for permanent residence.....	8	2	2	3	4
Petitioner failed to:					
Sign petition in own handwriting.....	3	6	1	1	5
Reside within jurisdiction of court.....	25	22	33	45	24
File valid certificate of arrival.....	7	8	2	1	5
File valid declaration of intention.....	21	16	28	16	15
Support petition by oral testimony of witnesses.....	6	-	1	2	1
Petitioner is an alien enemy not entitled to exemption.....	-	-	-	-	60
Petitioner withdrew petition.....	33	45	28	55	772
Petitioner failed to prosecute petition.....	2,718	<u>3</u> /1,936	<u>3</u> /1,474	<u>3</u> /1,537	<u>3</u> /908
Petitioner died before petition disposed of.....	338	277	201	197	168
Other reasons.....	39	29	34	23	12

1/ In 1951, knowledge and understanding of the fundamentals of the history, and the principles and form of Government of the United States.

2/ In 1951, ability to speak, read, or write the English language.

3/ In most of these cases the petitioner failed to prosecute the petition for naturalization after notice that the petition would be recommended for denial on the merits of the case.
